

THE CENTER FOR RURAL HEALTH WEBINAR SERIES

A webinar series focused on providing technical assistance to rural stakeholders to disseminate research findings, policy updates, best-practices and other rural health issues to statewide rural partners and stakeholders throughout the state.

Webinar:
Tuesday, June 20, 2017
12:00 pm Arizona Time

Caregiving Violence: Who are the victims and who are the perpetrators?

Learning objectives:

1. Identify risks, contexts and settings that influence violence in caregiving for those receiving and those providing care including the “special risks” related to living in rural settings.
2. Describe care strategies and interventions that can reduce the risk for escalating caregiving violence
3. Identify resources in rural settings that can reduce risks and promote healthy interactions between those receiving care and those providing care.

With NIH funding and funding from other sources, for over thirty years **Dr. Linda Phillips** has been engaged in studying facets of aging, elder abuse, family caregiving, frailty, and dementia. Cross-cultural issues in caregiving for older individuals, particularly focused on caregiving among Mexican-Americans, has also been a major theme. She has published over 100 research papers in peer reviewed journals and has spoken on the topic of elder abuse and family caregiving to national and international groups.
