NATIONAL CONSORTIUM OF
TELEHEALTH
RESOURCE CENTERS

Funded by the U.S. Health Resources and Services Administration (HRSA) The National Consortium of Telehealth Resource Centers (NCTRC) consists of 14 Telehealth Resource Centers (TRCs). As a consortium, the TRCs have an unparalleled amount of resources available to help virtual programs across the nation, especially within rural communities. Each TRC is staffed with telehealth experts to who are available to provide guidance and answer questions. As telehealth continues to gain more visibility and recognition in healthcare, the TRCs will remain positioned to provide assistance for all.

ARIZONA TELEMEDICINE PROGRAM

Telemedicine In the News

August 2023

Each month the Arizona Telemedicine Program compiles interesting telemedicine articles, stories, journal articles, and online resources from Arizona, the southwest region, and nationally, making it easier for you to see what is happening in telemedicine and telehealth.

Keep an eye on your inbox for our monthly recap!

Bisbee's Copper Queen Community Hospital receives grant to expand and boost telehealth in the process | 13 News kold.com

"Telehealth became super important during Covid,' she said. ... That revelation was how she wrote an almost \$10 million grant to help fund a 27-thousand-square-foot surgery and in-patient facility with two operating rooms and two endoscopy rooms. Once that is completed, telehealth services can expand within the current facility on campus. The expansion helps keep patients near their families instead of going to other places like Tucson."

CO Telehealth Utilization Skyrocketed Following PHE Onset | mHealth Intelligence

"Telehealth utilization and spending in Colorado rose during the public health emergency, largely driven by mental health conditions and younger populations."

Announcements from the Federal Office of Rural Health Policy

[Read this online.](#)

September 7, 2023

What's New

[New Awards to Address Rural Opioid Overdose.](#) Last week, HRSA announced more than \$80 million in new awards for the Rural Communities Opioid Response Program (RCORP). Now moving into its sixth year, the [nine grant programs under RCORP](#) make up the federal response to the opioid crisis that is specific to rural communities, where [rates of drug overdose are higher](#). RCORP funding supports interventions such as distributing the lifesaving overdose reversal drug naloxone, increasing treatment sites, expanding access to behavioral health care, and caring for infants at risk for opioid exposure.

[September is Suicide Awareness Month.](#) The latest provisional data from the Centers for Disease Control and Prevention (CDC) showed [the highest number of deaths on record](#) in 2022. Rates were highest among American Indian and Alaska Native people, males, and people who live in rural areas. The National Institute of Mental Health (NIMH) provides a digital toolkit (in headline link) with sharable messages for email and social media platforms. And on **Tuesday, September 12**, NIMH will hold a 90-minute [webinar on Suicide in American Farming](#).

Telemedicine and Telehealth Overview

The history, progression and current uses of Telemedicine and Telehealth.

Clinical Applications Overview

Clinical services (real-time and store-forward) that have been amenable to telemedicine consultation and how these services can help underserved areas.

Telecardiology

Definition of telecardiology services, requirements to provide this service, and current applications.

Teledermatology

Definition of teledermatology services, requirements to provide this service, and current applications.

Telenursing

How telenursing can help close the nursing shortage gap. Case studies are presented and outcome results are discussed.

Telepathology

Definition of telepathology services, requirements to provide this service, and current applications.

Telepsychiatry

Definition of telepsychiatry services, requirements to provide this service, and current applications.

Teleradiology

Definition of teleradiology services, requirements to provide this service, and current applications.

Teletrauma

Definition of teletrauma services, requirements to provide this service, and current

Distance Education

The role of tele-education in continuing medical education for various healthcare professionals and the necessary components to set up such a program.

Evaluation

The importance of evaluation in telemedicine/telehealth and how it relates to acquiring and organizing data about the program that can be used to obtain funding for increased sustainability.

Business

Sources of funding for telemedicine/telehealth programs, the business model developed and used by the Arizona Telemedicine Program, and paths towards sustainability and business planning.

Facility Design

Go through the steps required to set up a telemedicine/telehealth facility, including placement of the equipment, lighting, wall color, etc.

Video and Data Communication

Basic introduction to networking and data communications. Description of the Internet, local area networks, Ethernet, wireless communications and communication modes (e.g., Internet, satellite, wireless), including the advantages and disadvantages of each as they relate to telemedicine/telehealth.

Telemedicine/Telehealth Network

Basics of how a telemedicine/telehealth network is set up and the roles of various pieces of equipment: CODECs, MCUs, computer applications (e.g., videoconferencing, Skype), video bridges, gatekeepers, and communication protocols (e.g., H.239).

Culture, Etiquette & Technology

The impact of technology on social interaction and the universal rules of good manners and technology.

NCTRC WEBINAR SERIES

- Basic telehealth knowledge in implementation and best practices.
- Learn from experienced peers, providing a sound foundation when setting up their own telehealth program.
- Accessibility to telehealth experts throughout the nation.

Writing for the Southwest Telehealth Resource Center Blog

We're always looking for guest authors to share their experiences and perspectives related to telemedicine and telehealth.

Who Can Contribute

We welcome guest posts from healthcare executives and professionals, community members, patients, faculty, students and anyone else who has a telemedicine story to share.

ATP/SWTRC WEBINARS

A platform for knowledge-sharing!

Educational webinars

CME webinars

What you do:

At least 3 weeks prior to the webinar:

- Incorporate telemedicine/telehealth
- Provide educational, not commercial information
- Title of presentation
- 3 objectives, headshot, biography
- Short description of webinar

What we do:

- Create a marketing flier
- Promote webinar through our network, social media, & Events Blast
- Host the live webinar
- On-demand webinar archive
- CME accreditation (as applicable)
