

Southwest Telehealth Resource Center Updates & National Trends

Elizabeth A. Krupinski, PhD
Associate Director of Evaluation ATP
Director SWTRC

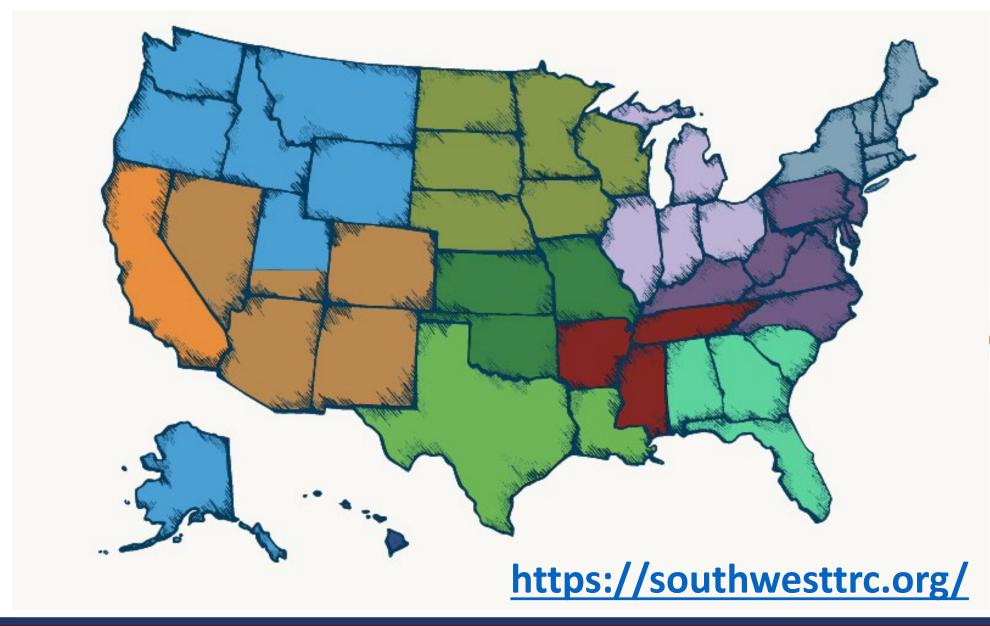

Professor & Vice Chair for Research Department of Radiology & Imaging Sciences Emory University

SWTRC

- 1-year special COVID funding ended 3-31-22
- Legacy renewal 6 U1UTH42527-01-02
 - Cooperative agreement
 - 9/1/21 8/31/24
 - Same level \$\$
 - Redefined region covered
 - Recent mtg HRSA indicated might extend 1-2 years without resubmission
 - Possibility dedicated allocations if funds available

New HRSA Administrator

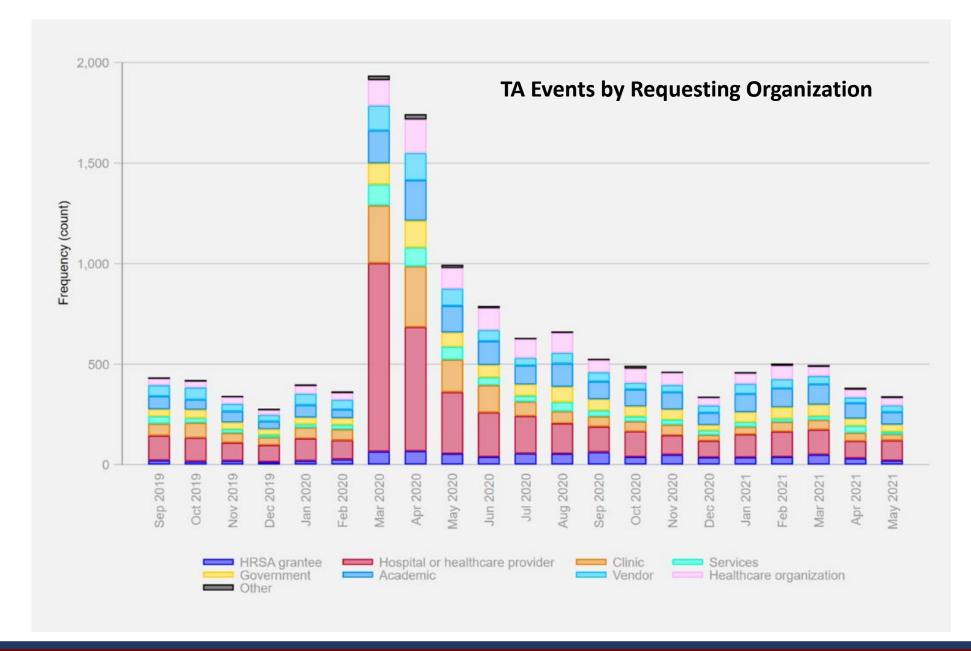

Carole Johnson

- White House COVID-19 Response Team
- Commissioner NJ Department of Human Services
- Domestic Policy Council public health lead in Obama White House on Ebola & Zika responses, implementation Affordable Care Act, combatting opioid epidemic
- Capitol Hill health staff for US Senate Special Committee on Aging, US Senate Finance Committee, US House of Representatives Ways & Means Committee.
- Department Health and Human Services managed health care workforce policy issues for HRSA & was policy director Alliance of Community Health Plans program

Telehealth Use Trends

CLINICAL OUTCOMES

85% of physician respondents indicate they currently use telehealth. For those that report a decrease in use indicate now doing a mix of in-person and virtual care.

- 60% of clinicians agree or strongly agree telehealth enabled them to provide high quality care.
- Of those using telehealth, 93% (13%) are conducting live, interactive video visits with patients and 69% are doing audio-only visits.
- 56% of respondents are motivated (agree and strongly agree) to increase telehealth use in their practices.
- 8% (4%) of respondents said they were using remote patient monitoring technologies with patients in their homes; the commonly used tools include smartphones (camera), blood pressure cuffs, pulse oximeters, and body weight scales. 76% (7.6%) report data is usually shared manually (e.g. verbally over the phone or via email).

PATIENT EXPERIENCE

- More than 80% of respondents (12%)
 indicate patients have better access to care
 since using telehealth.
- 62% of respondents feel patients have higher satisfaction since offering telehealth.
- 63% (1 12.2%) of respondents report 75% or more of virtual visits are conducted with patients they have an existing relationship with.

PROFESSIONAL SATISFACTION

 A majority of respondents indicated that telehealth has improved the satisfaction of their work 54.2%.

COST

 44% of respondents indicated that telehealth decreased the costs of care (strongly agree or agree)

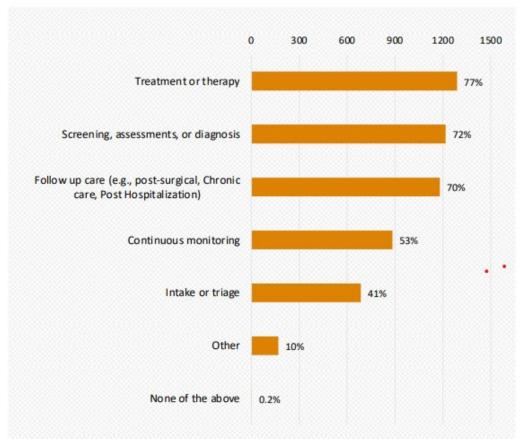

Note: Trend comparisons refer to the <u>COVID-19 Healthcare Coalition Physician Survey</u> fielded in 2020. © 2022 American Medical Association. All rights reserved.

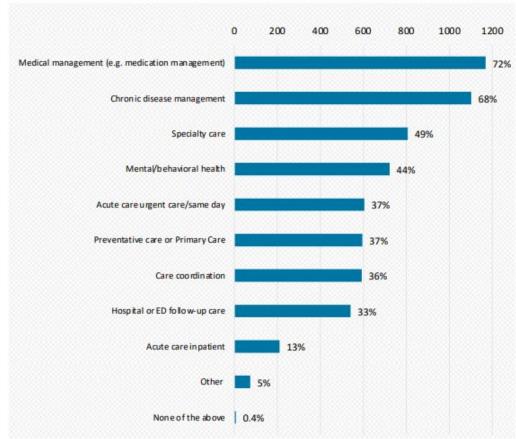

Telehealth is currently being used across many aspects of clinical care and used to deliver a variety of services

What aspects of care do you provide via telehealth? (select all that apply) N=1,682

What services do you or your practice/organization currently provide via telehealth? N=1,630

Physicians' powerful ally in patient care

Most physicians feel telehealth allows them to provide more comprehensive quality care

"As a pediatrician, it gives me an opportunity to see children and their families in a setting (home) in which they feel comfortable, and this sometimes reveals strengths of the family."

"At-home blood pressure monitoring has enabled us to diagnose more white coat and masked hypertension"

To what extent do you agree or disagree with the following statements? Telehealth has allowed our practice to provide more comprehensive quality care for patients. N=1,393 Is there any additional insight or thoughts you would like to share regarding the impact of telehealth on you, your practice, or your organization?

Physicians identify the digital divide as the biggest barrier to virtual care for patients

"Reduce the digital divide that impairs many patients' access to telehealth services."

"Many of my patients are not that well versed in technology and telehealth is a real big challenge for them."

"Advancing telehealth without providing patients with the appropriate technology or education to use it, leaves those patients behind and widens the gaps."

Which of the following, if any, do you perceive as barriers to your patients using telehealth? (select all that apply) N=1,531 Is there any additional insight or thoughts you would like to share regarding the impact of telehealth on you, your practice, or your organization?

What Now?

- PHE extended to July 15, 2022
- AMA, ATA, GAO & numerous other organizations advocating for:
 - Permanent payment coverage
 - Further expansion payment codes
 - Retain audio-only
 - Increase broadband access
 - Further research: equity, quality, costs, disparities reimbursement, best practices, implementation science, clinical appropriateness, metrics

Thank you!
