

Project ECHO Nevada: Telehealth for Nevada's Rural Communities

Troy C. Jorgensen, Senior Program Manager
University of Nevada, Reno School of Medicine
Office of Statewide Initiatives
Project ECHO Nevada

Objectives

1. Describe the Project ECHO model and history
2. Review the role of Project ECHO in Nevada
3. Examine the impact of ECHO programs
4. Review collaboration with Medicaid and evaluation

Troy Jorgensen, BS

- Senior Program Manager since 2022
- Joined Project ECHO Nevada in 2016 after completing B.S. in Community Health Sciences
- Passionate about understanding the needs of Nevada's communities and how ECHO can support local providers
- Currently pursuing a Masters in Healthcare Administration at UNLV

Project ECHO History & Model

What is Telehealth?

Definition - The use of information technology to deliver education, research, and clinical care

What it does – Telehealth is the delivery of clinical services through telecommunications

How it does it - Telehealth moves information electronically to consumers quickly and efficiently without a patient physically seeing a health care provider

- Telehealth initiatives should strengthen rather than compete with other health services

Four Elements to Telehealth

1. Its purpose is to provide clinical support.
2. It is intended to overcome geographical barriers, connecting users who are not in the same physical location.
3. It involves the use of various types of information and communication technology (ICT).
4. Its goal is to improve health outcomes.

World Health Organization (WHO)

Four Categories of Telehealth

Synchronous
Video Conference
Visits, Phone
Calls, Chat Based
Interactions

Electronic
Medical Record
(EMR) - Gather,
store, and
communicate
clinical data

Acute Disease,
Chronic Disease,
and Preventative
Care

Asynchronous
Remote
Monitoring

Hospital Based
Telemedicine

Technology
enabled

Robotic Surgery

Artificial
Intelligence - data
interpretion,
diagnostics, and
therapeutics

Project ECHO

<https://www.americantelemed.org/resource/why-telemedicine/>

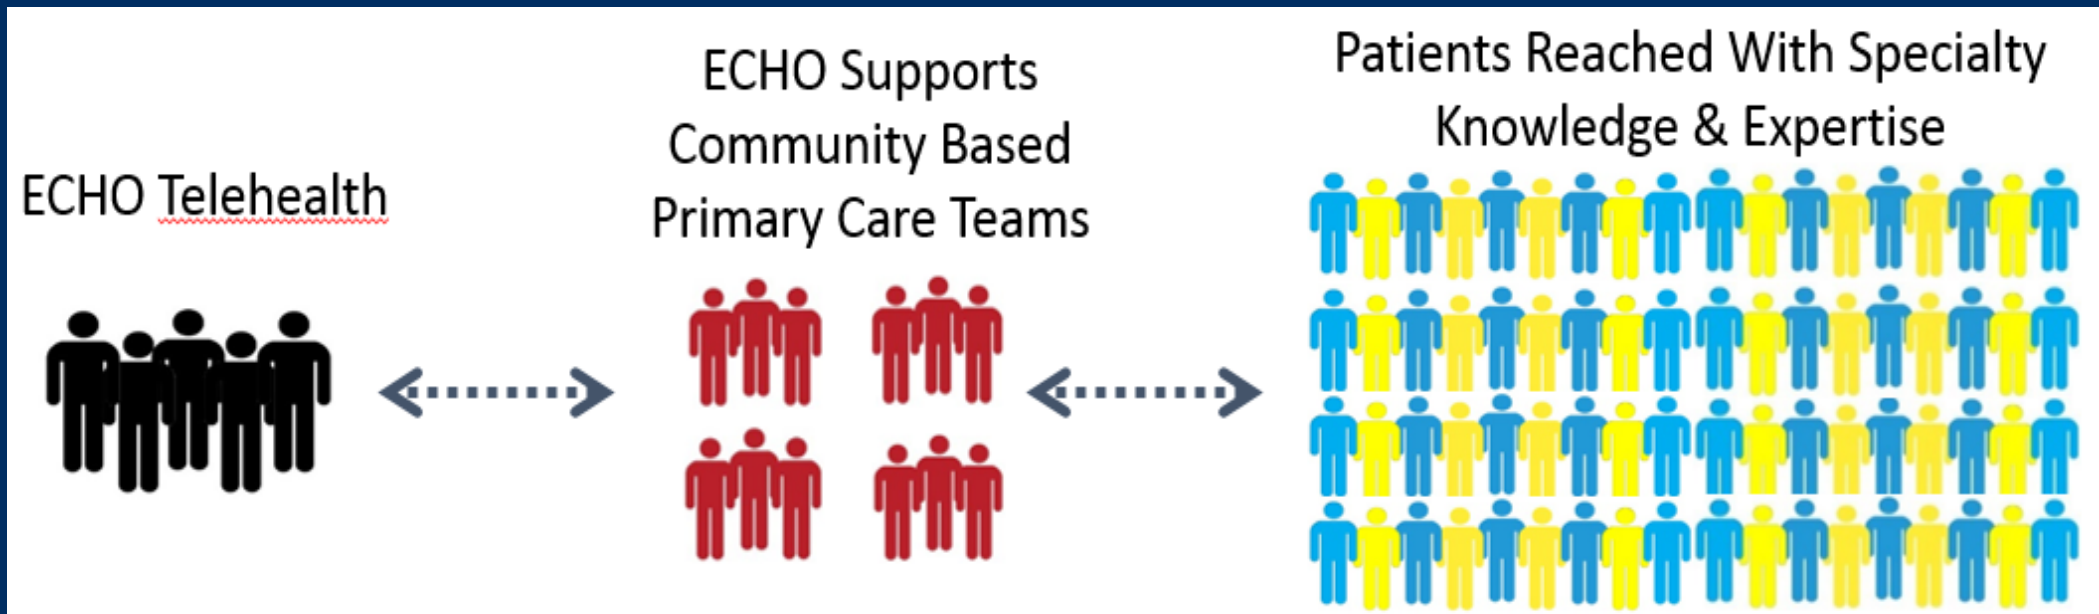

What is Project ECHO?

- Project ECHO is a form of telehealth that maximizes scarce specialty care resources
- Connects specialists/subject matter experts with healthcare professionals for case consultation and continuing education
- Primary focus is on case-based education to master complexity and increase capacity

Telemedicine vs. Project ECHO

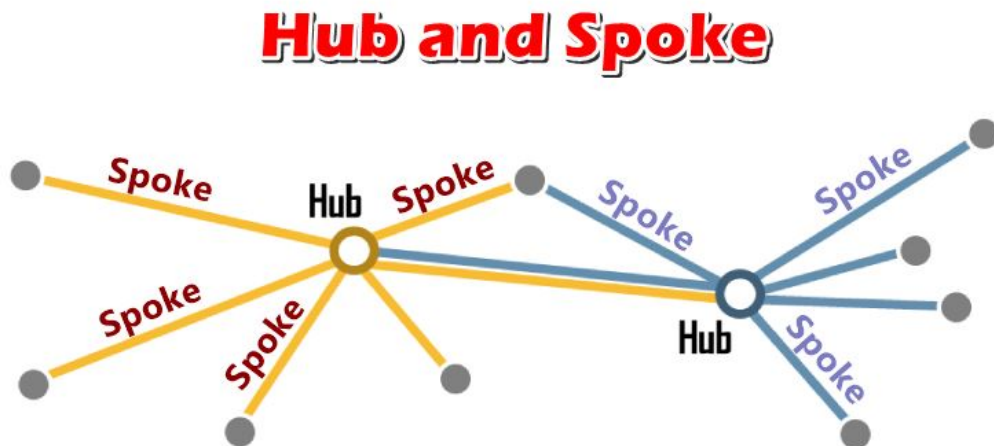

Hub and Spoke Model

Hub team includes:

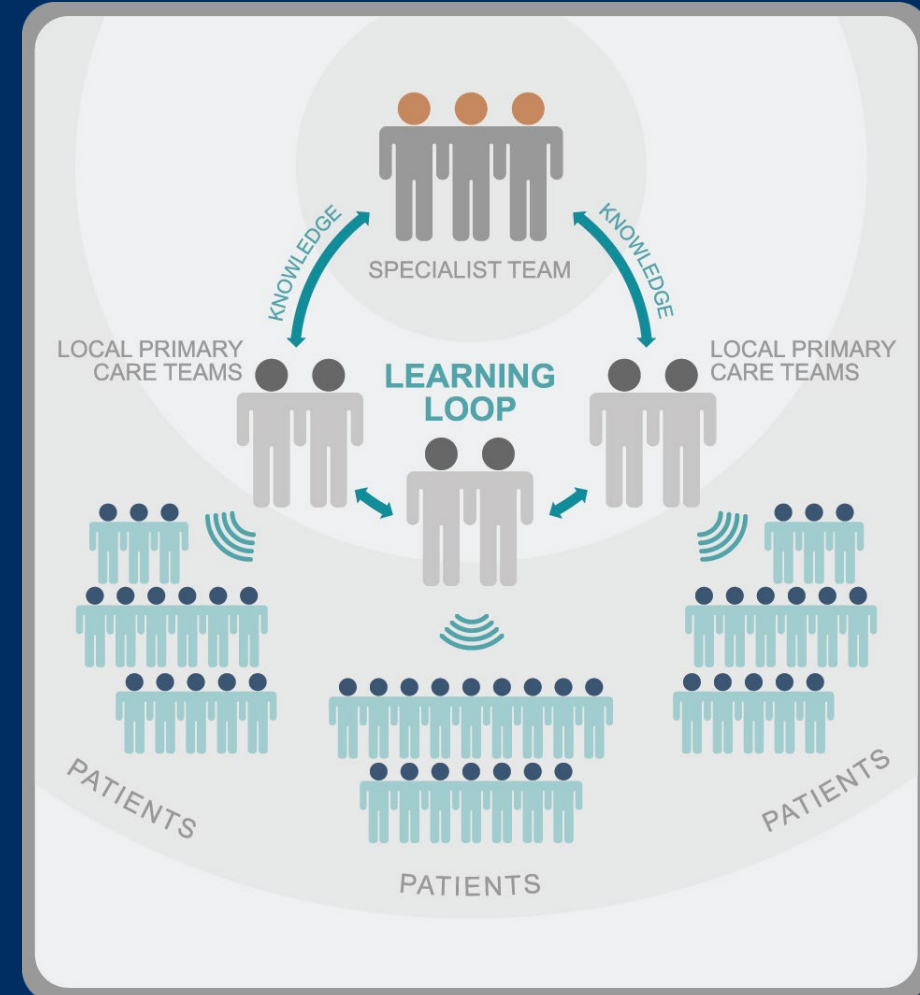

- Facilitators & staff
- Multidisciplinary team of Subject Matter Experts (SME)

Spokes include:

- Healthcare professionals
- Interdisciplinary care teams
- Social services professionals
- Community health workers

Learning Loop/ATAL

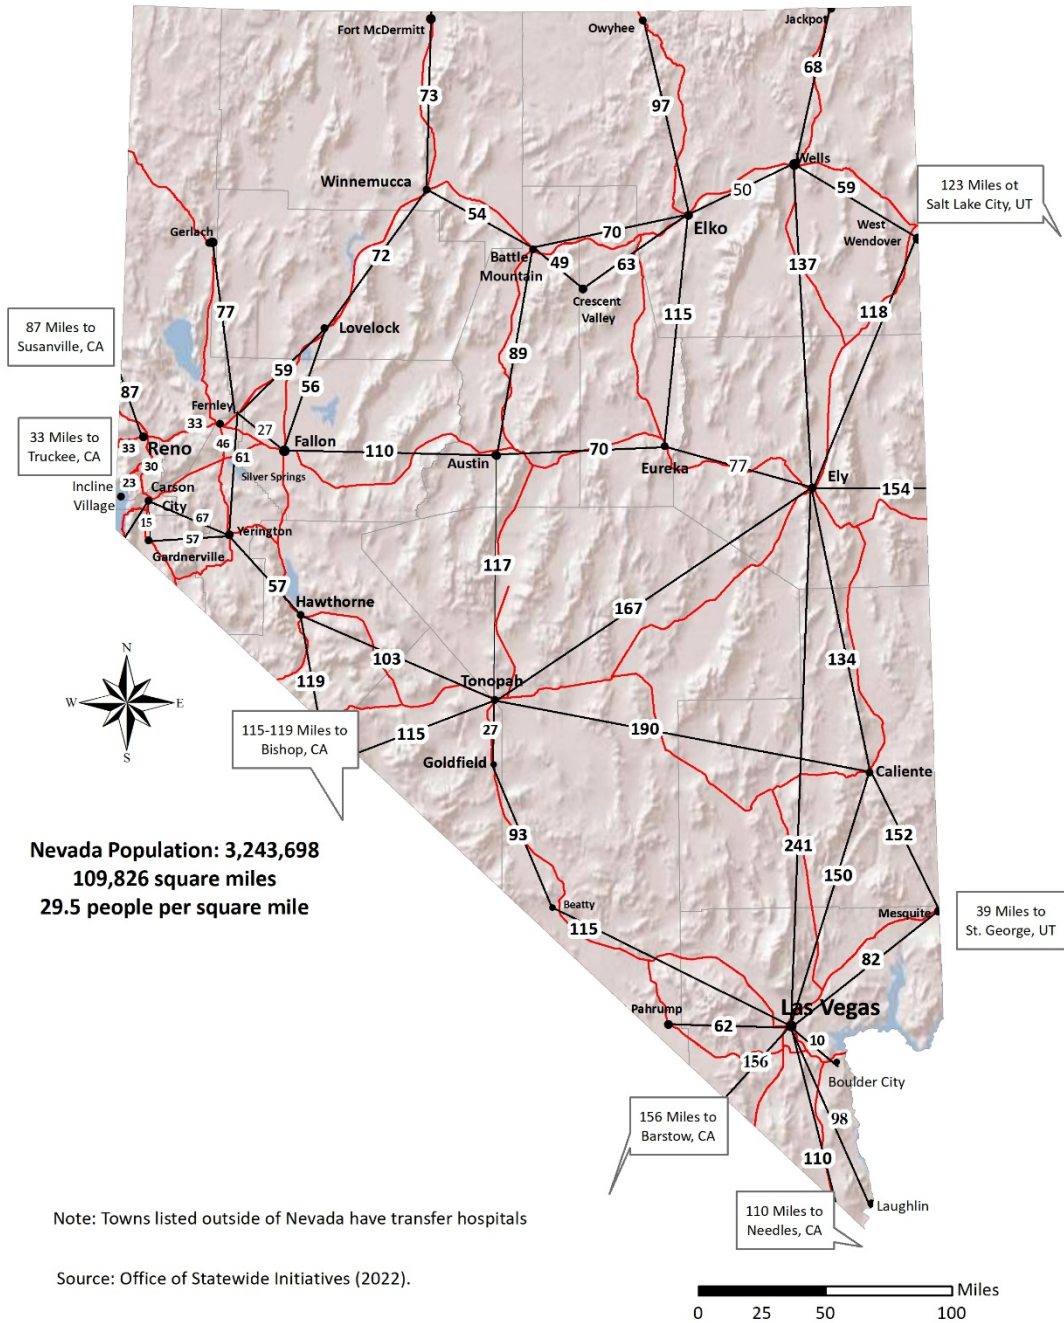

Role of Project ECHO Nevada

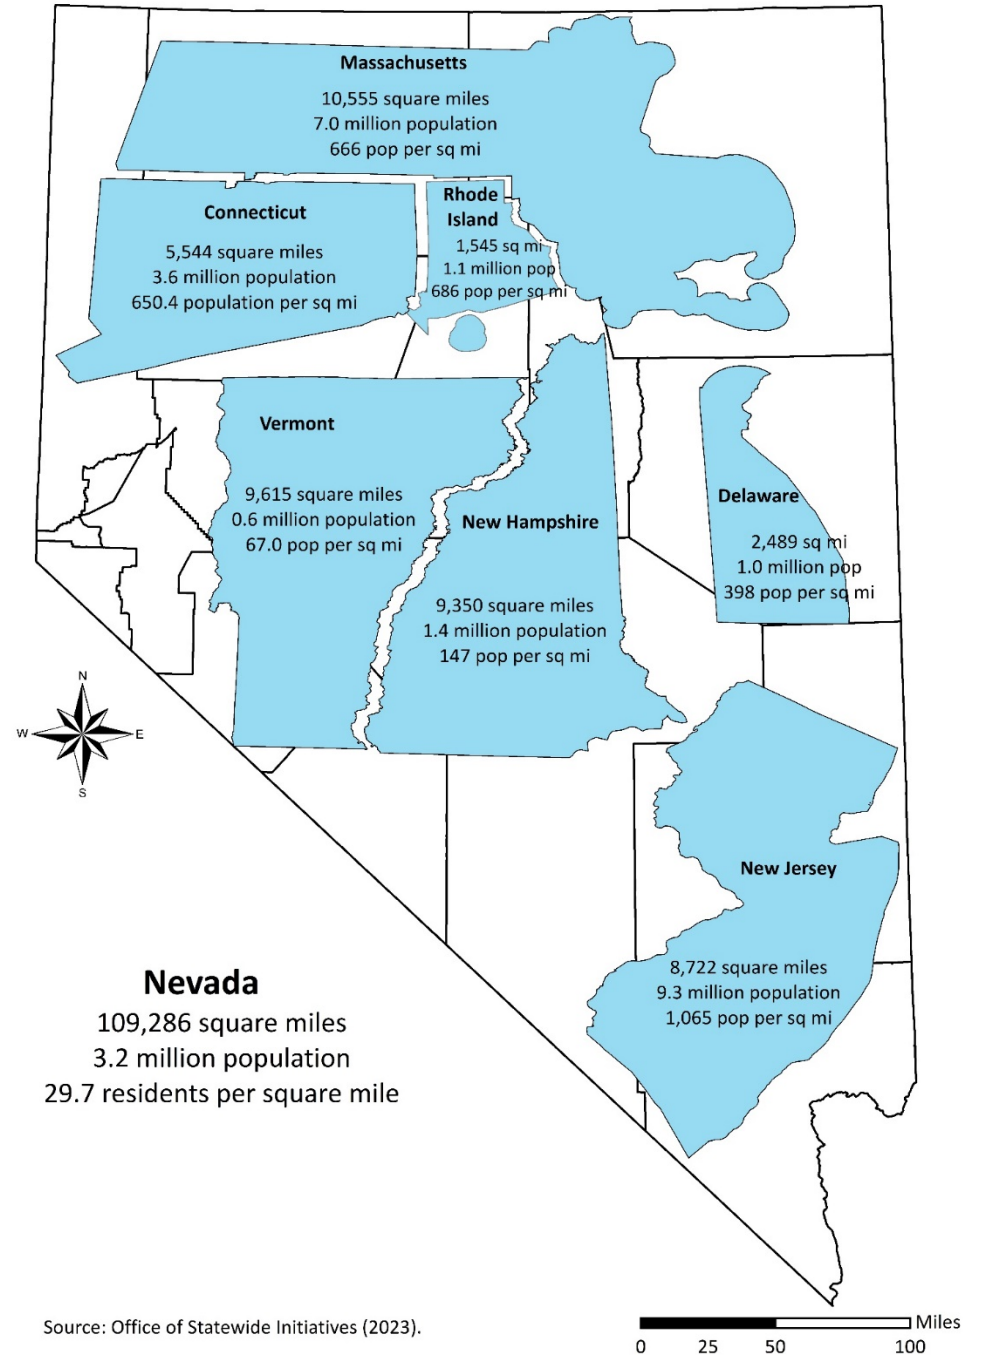

- Support healthcare professionals in rural and underserved areas through teleconsultation with subject matter experts
- Respond to needs of local community through development of new programs to meet those needs
- Collaborate with various state, regional, and national partners to administer programs
 - Recruitment of subject matter experts that may not exist in Nevada
- Connect healthcare professionals with resources from across the state and region

Nevada Mileage Diagram

Map 5: Visualizing the Population of Seven Eastern States Within Nevada

Our Team

What We Offer

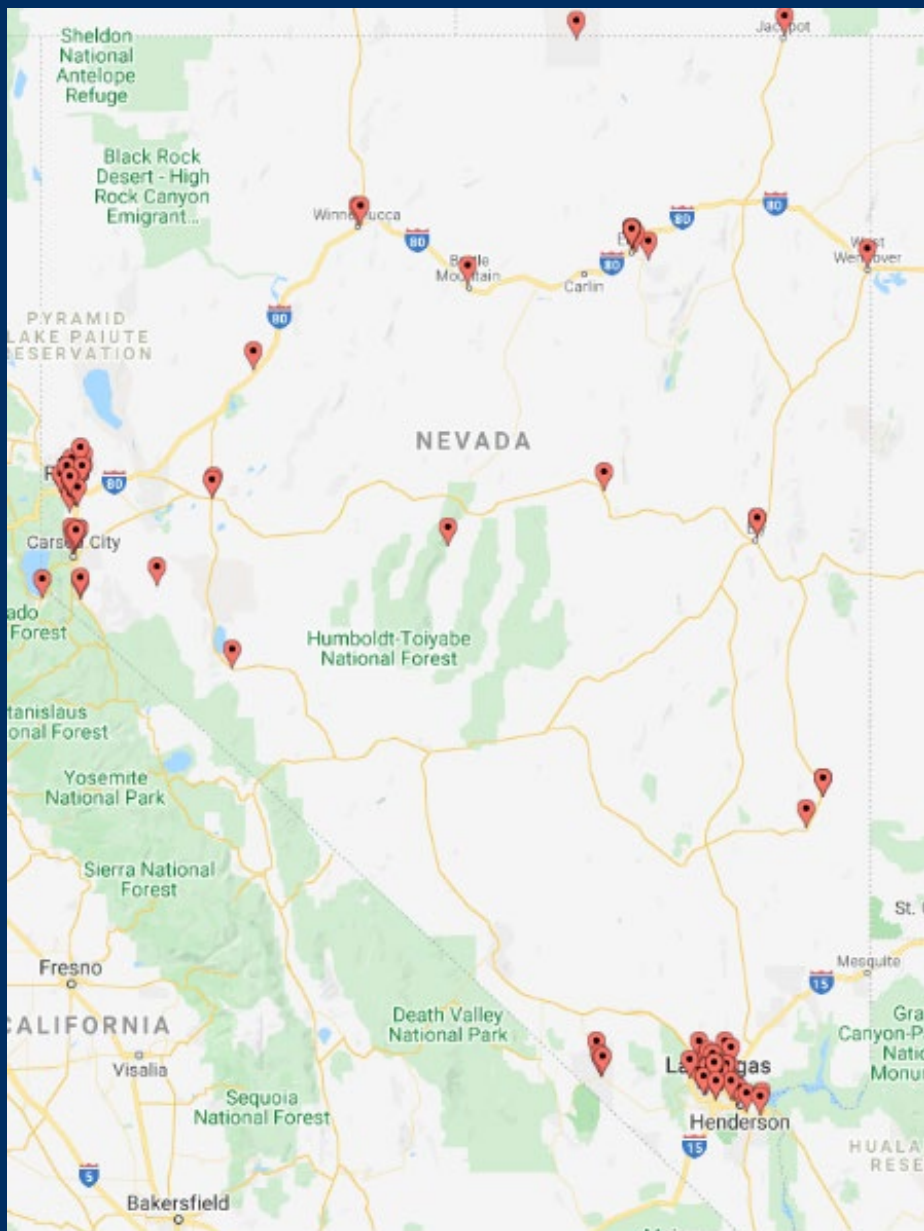

- Access to specialists and subject matter experts
 - Synchronous (real-time) case review with clinical subject matter experts
- Connection with colleagues and friends across the state
- Free CME/CEU credits for attending
 - *AMA PRA Category 1*
 - Nursing
 - MFT/CPC
 - Pharmacy
 - Social Work
 - Psychology
- Didactics/handouts/resources
 - [References and Resources BOX](#)[™] folder with previous presentations (slides, handouts, resources, etc.)
- Access to previously recorded sessions in our [OnDemand Library](#)

Impact of Project ECHO Nevada

Project ECHO Nevada Impact - 2019

PROJECT ECHO NEVADA | 2019 ANNUAL REPORT

The purpose of Project ECHO Nevada is to expand the capacity of health professionals to effectively treat chronic, common and complex health conditions in underserved populations throughout Nevada.

146 CLINICS ADDRESSING **20 TOPIC AREAS**
 INCLUDING NEW CLINICS ON PALLIATIVE CARE AND NUTRITION

493 HEALTH CARE EXPERTS AND **2,972 LEARNERS**
 BASED IN NEVADA, ARIZONA, CALIFORNIA AND DELAWARE

75 CASE PRESENTATIONS REVIEWED AND CONSULTED ON BY MEDICAL EXPERTS RELATED TO DIABETES/ENDOCRINE (21), PAIN MANAGEMENT (19) AND MEDICATION ASSISTED TREATMENT (13)

480 CME CREDITS DELIVERED

University of Nevada, Reno
School of Medicine
 Project ECHO

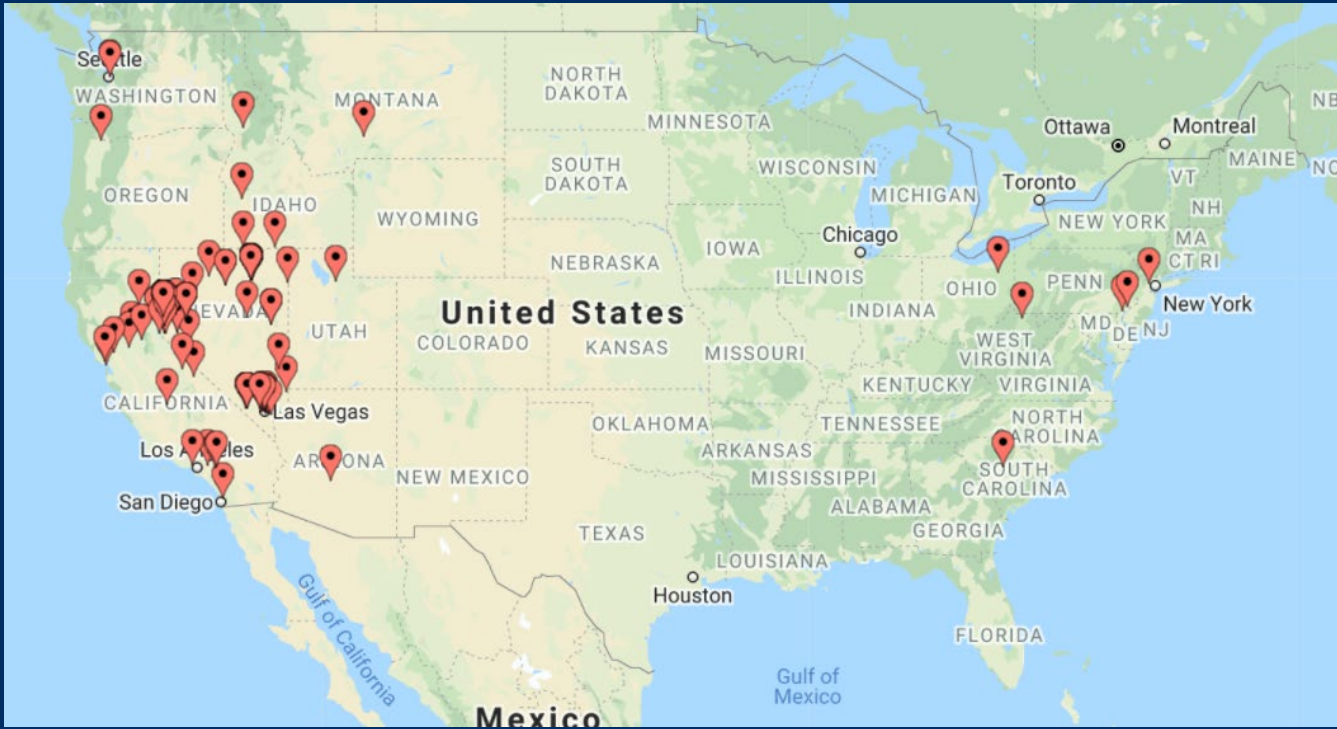

Attendance - BY - Geography

RURAL NV: **20.3%** | URBAN NV: **74.3%**
 OUT OF STATE: **5.4%**

Project ECHO Nevada is fully integrated into the University of Nevada, Reno School of Medicine's strategic priority to expand our clinical platform to improve access to quality care for Nevadans while enhancing medical education.

Project ECHO Nevada Impact - 2020

PROJECT ECHO NEVADA | 2020 ANNUAL REPORT

The purpose of Project ECHO Nevada is to expand the capacity of health professionals to effectively treat chronic, common and complex health conditions in underserved populations throughout Nevada.

MORE THAN A 50% INCREASE IN BOTH EXPERTS AND LEARNERS OVER THE PREVIOUS YEAR

REVIEWED AND CONSULTED ON BY SUBJECT MATTER EXPERTS

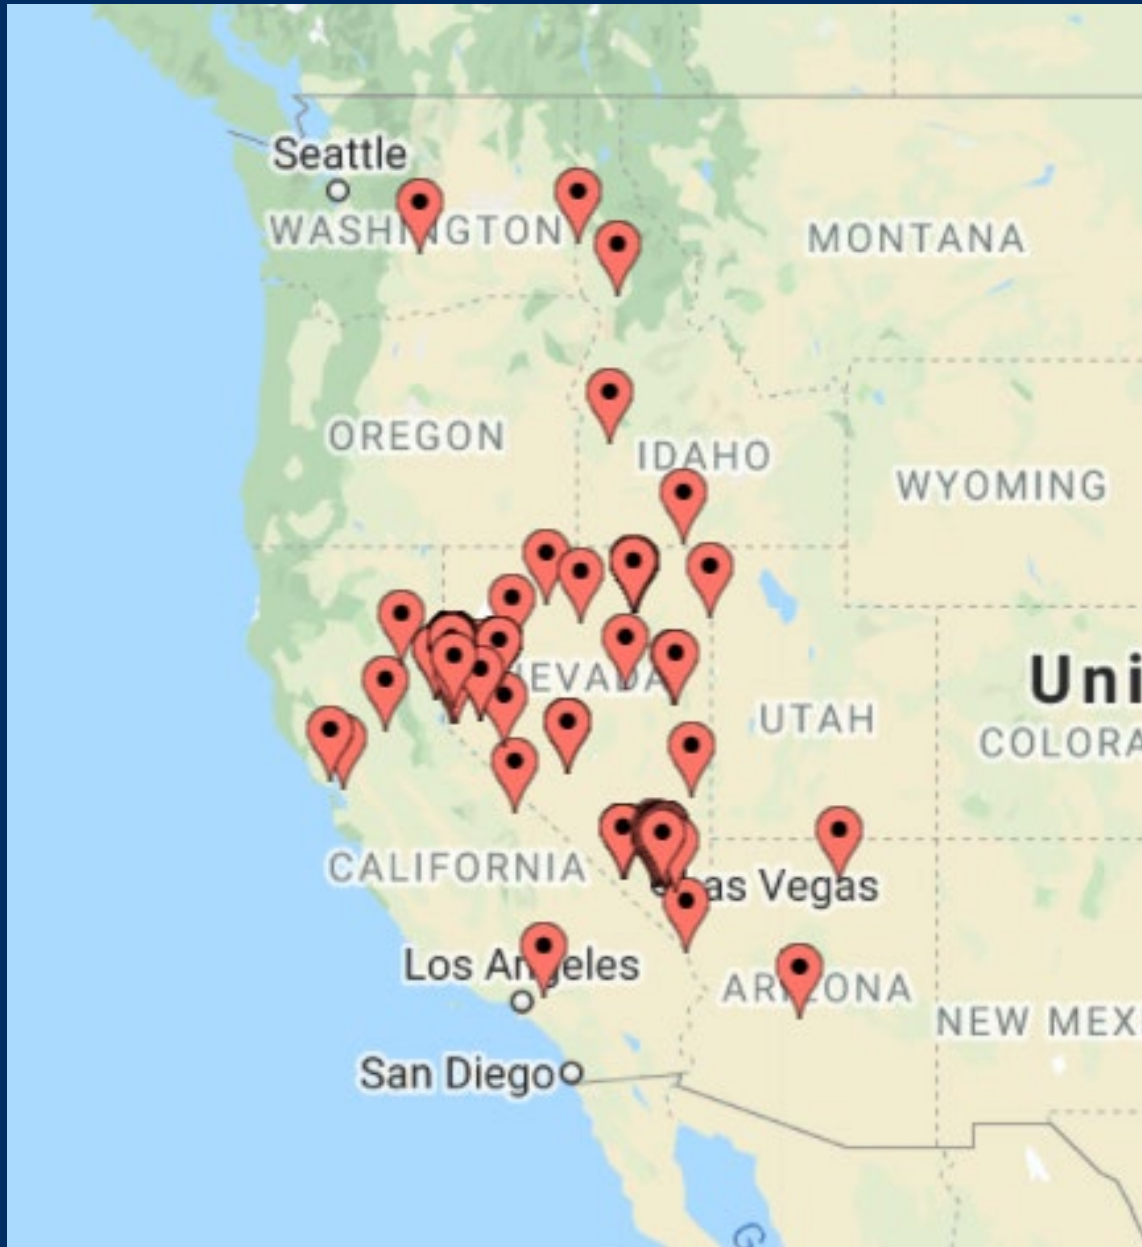

Project ECHO Nevada is fully integrated into the University of Nevada, Reno School of Medicine's strategic priority to expand our clinical platform to improve access to quality care for Nevadans while enhancing medical education.

Medicaid Managed Care & Project ECHO

Inclusion in Medicaid RFP

- In 2021, the State of Nevada included the following language in its Managed Care Request for Proposals (RFP)
 - The Contractor must demonstrate a commitment to improving health outcomes in local communities in which it operates through community reinvestment activities. The Contractor's community reinvestment must be used to support population health strategies, which will include, but may not be limited to, financial support for Project ECHO and Nevada's Perinatal Quality Collaborative. The Contractor is encouraged to work with other Contractors to maximize the collective impact of community reinvestment activities.
- This requirement was enacted beginning with the 2022 cycle for managed care organizations in Nevada
- Four (4) MCOs selected for a four (4) year contract period

Collaboration w/ MCOs

- In 2021, SilverSummit Healthplan (SSHP), a Centene corporation, sought to establish a multi-part ECHO series focusing on Pain Management for providers in their network
- Created a 6-part series targeting areas of need identified by SSHP, including; reducing number of opioid prescriptions, reducing unnecessary referrals to pain management, and improving provider knowledge about pain treatment
- Pre- and post-test knowledge surveys conducted, along with claims data analysis to evaluate impact
- To date, we have conducted a total of three (3) series with SSHP

Collaboration w/ MCOs cont.

- In 2021, Anthem sponsored a 6-part series on Medication-Assisted Treatment
- Currently, three (3) MCOs (Molina, United, & SSHP) are sponsoring a series on Medications for Opioid Use Disorder
- Service Agreements are established for all programs with a flat-fee to cover ECHO's costs, as well as inclusion of a provider incentive/bonus system to encourage attendance and case review
- All programs include a pre-/post- knowledge survey and claims data analysis

State Medicaid Support

- Inclusion in RFP was a major first step towards engraining ECHO into Medicaid funding
- Conducting quarterly meetings with State Medicaid Director to discuss opportunities for ECHO and continued funding
- In January 2023, a letter was sent to all State Medicaid Directors expanding availability of reimbursement for interprofessional consultation which includes modalities like ECHO
 - We are currently working with our State Medicaid team to identify appropriate CPT codes for billing of ECHO consultation services

SilverSummit Evaluation Results

1st Cohort - 2020

Improvement in self-efficacy

Providers were asked about their self-efficacy on a range of pain management skills before and after the program

Improvement in pain care knowledge

- Providers* completed a pre-test and post-test with questions about pain management and were scored for accuracy
- Over half of the providers had a higher score on the post-test
- On average, scores **increased** 4 percentage points from the pre-test to the post-test

80 → 84%

*10 of 11 providers completed post-tests.

Claims Data Review Process

- Claims data was collected for SilverSummit providers that participated in the Pain Management ECHO Program and matched to SilverSummit providers that did not participate
- We then reviewed these provider's claim data for patients with a diagnosis of Chronic Pain
 - Among those patients with three outcomes were examined
 1. Use of any opioid medication
 2. Use of higher dose opioid prescriptions
 3. Use of any non-opioid pain medication

Summary of Claims Data Evaluation

Comparison: SilverSummit prescription claims data from ECHO participating providers (n=5) and non-ECHO (n= 10) providers

Project ECHO participating providers prescribed:

- Fewer opioid prescriptions overall
- More non-opioid pain prescriptions

Outcomes (county & percent)

| Provider Category | Time Period | Total Rx | Total opioids rx | Total opioid rx as a % of total rx | Total opioid rx > 20 MME/day | Opioid rx > 20 MME/day as a % of total opioid rx | Total non-opioid pain rx | Non-opioid pain rx as a % of total rx |
|-------------------|-------------|----------|------------------|------------------------------------|------------------------------|--|--------------------------|---------------------------------------|
| ECHO Group | Before | 3728 | 65 | 2% | 19 | 37% | 109 | 3% |
| | After | 3369 | 32 | 1% | 10 | 53% | 156 | 5% |
| Non-ECHO Group | Before | 12793 | 665 | 5% | 536 | 80% | 570 | 4% |
| | After | 12929 | 628 | 5% | 501 | 80% | 748 | 6% |

Wrap-up

Quick Review

- Project ECHO is a global telehealth platform
- Project ECHO Nevada started in 2012
- Not traditional telemedicine
 - Project ECHO is a provider-to-provider telehealth platform
- Increases access and quality of care by using a **case-based learning model**

Project ECHO Goals

- Reach the lives of 1 billion people by 2025
- We depend on support from various stakeholders
 - Community partners
 - Other ECHO hubs
 - Funders
 - Legislative and policy makers
 - New statewide or regional partners
- We encourage you to contact us with new ideas or proposals!
