NATIONAL CONSORTIUM OF
TELEHEALTH
RESOURCE CENTERS

Funded by the U.S. Health Resources and Services Administration (HRSA) The National Consortium of Telehealth Resource Centers (NCTRC) consists of 14 Telehealth Resource Centers (TRCs). As a consortium, the TRCs have an unparalleled amount of resources available to help virtual programs across the nation, especially within rural communities. Each TRC is staffed with telehealth experts to who are available to provide guidance and answer questions. As telehealth continues to gain more visibility and recognition in healthcare, the TRCs will remain positioned to provide assistance for all.

Health Kiosk

With many people unaware of their health status and skipping doctor visits , the Health Kiosk is an easy, convenient way for employees to become more aware of their health status – which can inspire action toward disease prevention.

Easy to use. Self-serve. Convenient. Confidential.

Use the Health Kiosk to quickly and accurately measure your vital statistics to help you better manage your personal health. Tests include:

- Blood pressure
- Total body weight & body mass index (BMI)
- Heart rate
- Vision (color blindness)
- Hydration

It takes about five to eight minutes to test everything or you can choose which ones you need.

CURRENT COVID-19 DATA/INFORMATION

Advancing Health Equity, Addressing Disparities (AHEAD AZ) is a UArizona Center for Rural Health program funded through the AZ Department of Health Services (ADHS) – Centers for Disease Control and Prevention (CDC) National Initiative to address COVID-19 health disparities among populations at high risk for COVID-19 morbidity and mortality.

In collaboration with community partners across the state, the work of AHEAD AZ aims to promote community resilience focusing on the following areas:

- Community education and engagement
- Public health and healthcare workforce well-being and resilience, support, training, and education
- COVID-19 vaccination and recovery

Community Health Representative

The Community Health Representative (CHR) Program is a unique concept for providing health care, health promotion, and disease prevention services. CHRs have demonstrated how they assist and connect with the community, and their work has become essential to the spectrum of Tribal community-oriented primary health care services. CHRs are great advocates, in part, because they come from the communities they serve and have tribal cultural competence. Their dedicated work has assisted many to meet their healthcare needs. The health promotion and disease prevention efforts that CHRs provide have also helped people from the community improve and maintain their health. By providing health education and reducing hospital readmissions, CHRs have contributed to lowering mortality rates. The demand for CHRs continues to grow.

COMMUNITY HEALTH REPRESENTATIVE PROGRAM

Mission Statement

Established in 1968, the CHR and Outreach Program's goal is to improve the general health status of the Navajo people through direct home health care, community health care and health education in coordination with tribal and IHS programs. The program serves approximately 210,000 Navajo individuals both on and around Navajo Nation. The Outreach program continues to provide related services to control sexually transmitted diseases and tuberculosis on the Navajo Nation and surrounding areas.

- Health and nutrition education
- Health screening
- After-care and follow-up visits
- Care planning
- Referral visits
- Direct observation of medical treatment

- STD case finding and epi-surveillance
- Partner notification and referrals
- STD/HIV client services and counseling
- Public STD prevention and education
- Screening/investigation of TB cases and skin testing
- Evaluation of environment and development of babies

Promotoras

Community health workers

Promotores de salud, also known as promotoras, is the Spanish term for “**community health workers**”. The Hispanic community recognizes promotores de salud as lay health workers who work in Spanish-speaking communities.) is a communication campaign supported by the CDC Foundation, CDC and several other partners.

ADIN

Mission

Arizona Digital Inclusion Network (ADIN) is a growing, evolving coalition of organizations and individuals from across the state. We are affiliated with the National Digital Inclusion Alliance (NDIA) and working to advance digital equity in Arizona. We amplify, support and provide networking opportunities for community leaders interested in advancing digital inclusion within their communities.

We are committed to the following priorities:

1. Device access and affordability
2. Affordable, robust, equitably distributed broadband connectivity
3. Public digital skills instruction, digital navigation and technical support

We support sustainable public policies and funding strategies to meet these goals for the long term.

Vision

An Arizona where all individuals and communities have the information technology access and capacity needed for full participation in our society, economy and democracy.

Checkout Telehealth @ Your Local Library

Presenters: Janet Major, Associate Director for Innovation & Digital Health, ATP/SWTRC, and Malavika Muralidharan, E-rate Administrator, Arizona State Library, Archives & Public Records

Our future for delivering healthcare and improving access will need to include investing in technology and telecommunications connectivity in public places. Public places where we can have private conversations about our health, whether at our local library, school, or visiting a mobile unit connected to the internet. Technology + Connectivity can connect everyone in our communities to healthcare for clinical and educational applications, and our libraries have become partners in telehealth.

In this session: We will feature a panel to explore several state programs and modalities currently being used to provide access to healthcare in our trusted public places for people who often need it most. Investing in and managing technology and devices for those who do not have them is critical to increasing access to healthcare and eliminating the digital divide. We will explore several interesting programs from across the United States while sharing best practice protocols that will include everything from delivering telehealth services to our schools, in our libraries as well as the use of mobile units that provide not only technology and telecommunications connectivity but also deliver space and the ability to connect to our communities 'anywhere.'

What next?

Innovative Telehealth Projects with Native Americans

- ❑ The project on fiber and broadband to the Chapter Houses of the Navajo Nation, paid for through E-rate funding will help bring Telehealth to the Navajo and Tohono O'odham Communities in Northern Arizona.
- ❑ This project in collaboration by NIH's Native American Cancer Prevention team at NAU and supported by the LSTA grant through the State Library will use Native American Nurses and nursing students to ensure cultural sensitivity and protocols.
- ❑ The project is in the planning phase is being set up to work with the Navajo and Tohono O'odham tribes.
- ❑ Continue working with Pima County on the first pilot Telehealth Project at Ajo and Arivaca and use the lessons learned to replicate it in other libraries around the State of Arizona

Libraries in locations across the United States are beginning to offer their patrons access to telehealth services as a strategy for addressing inequities in digital access to healthcare. This class introduces telehealth, why it's important, and how it enables people to have greater access to quality healthcare. Explore how different libraries provided patrons in their communities with access to telehealth services. This class will address privacy and ethical concerns, and review the technology and infrastructure needed to launch a successful telehealth program in your library. The class will consist of three one-hour modules. Each module will focus on one of the course objectives, which are:

- Recognize the different approaches/models to providing telehealth access within libraries.
- Describe resources available to the library for Telehealth technology and the role of the library in support of digital skills training for telehealth.
- Address potential ethical and legal concerns in offering telehealth access within libraries.

By registering for this class, you are agreeing to the [NNLM Code of Conduct](#)

Objectives:

By working through 3, 1 hour modules of interactive content and completing a pre-post test, learners will be able to:

1. Recognize the different approaches/models to providing telehealth access within libraries.
2. Discuss considerations such as privacy and policy for offering telehealth access within libraries.
3. Identify infrastructure-related resources available to the library for providing telehealth services.
4. Describe the role of the library in support of digital skills training for telehealth.

Class Details

Date(s): July 10, 2023 - August 7, 2023

Platform: Moodle

CE Credits: 3.00

CE Categories: CHIS Level 2

Class Experience Level: Beginner

This is a National NNLM class.

Arizona Assets Map

Arizona counties and communities support a diverse economy and quality of life. The Arizona Assets map is an interactive tool that identifies infrastructure, land ownership, educational resources, community profiles and more. [Click here if viewing the map on a mobile device.](#)

To filter results, use the search bar in the top left of the map to narrow your search by city or zip. In addition, the toolbar allows users to search locations within a radius, view the legend, change the basemap and print or view information about the map.

In the top right of the map is an icon which allows users to turn layers, or categories, on and off.

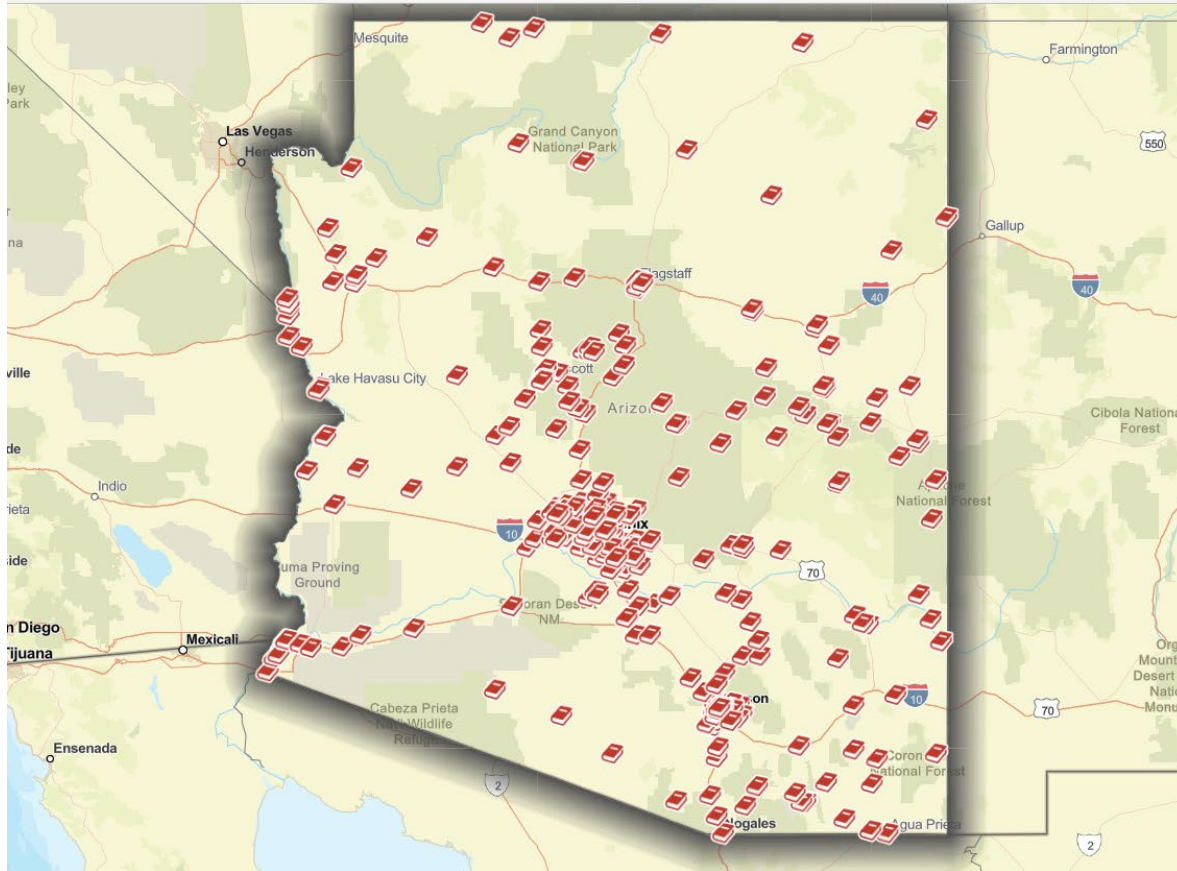

To learn more about the categories click on the icons within the map.

Note: All locations are approximate due to data limitations

My favorite FCC Handout

TEN MILLION HOUSEHOLDS CONNECTED

10 WAYS TO SPREAD THE WORD

01 HELP YOUR COMMUNITY ENROLL

Sign up as an enrollment partner today at fcc.gov/ACP.

02 SPREAD THE WORD

Are you organizing school packet pick-ups or a local food drive? Download and print ACP flyers to include in pick-up materials: fcc.gov/acp-toolkit.

03 REQUEST PRINTED MATERIALS

Printed versions of FCC ACP Outreach Toolkit materials are available. Send an email to ACPInfo@fcc.gov and provide details on what you need.

04 CONNECT WITH LOCAL INSTITUTIONS

Ensure schools, libraries, health clinics, and community centers know about the ACP and have info to help eligible students and patrons enroll.

05 INVOLVE YOUR LOCAL GOVERNMENT

Does your local employment assistance or social services office have ACP information? Put Outreach Toolkit materials in helping hands.

06 SHARE ACP INFO ON YOUR WEBSITES AND SOCIAL MEDIA

The FCC has ready-to-post graphics, videos, and PSAs available for you to share with your network in the ACP Outreach Toolkit.

07 REQUEST A SPEAKER FOR AN EVENT

Have a local event coming up? Want to train your members to serve as ACP ambassadors? Send a speaker request to ACPSpeakers@fcc.gov.

08 HELP CONNECT THE UNCONNECTED

Download and print application forms, worksheets and instructions in English or Spanish at ACPBenefit.org.

09 FIND LOCAL PROVIDERS

Browse listings by state or territory at fcc.gov/acp-providers-by-state.

10 LET EVERYONE KNOW

Spread the word about ACP on community bulletin boards, both online and around town!

Rural Health Information Hub

The screenshot shows the homepage of the Rural Health Information Hub (RHIhub). At the top left is the RHIhub logo with the tagline "Rural Health Information Hub". To the right are navigation links for "Updates & Alerts", "About RHIhub", and "Contact Us", along with social media icons for Facebook, LinkedIn, Twitter, and YouTube. A search bar is located below these links. A dark red navigation bar contains menu items: "Online Library", "Topics & States", "Rural Data Visualizations", "Case Studies & Conversations", and "Tools for Success". Below this is a banner with the text "Your First Stop for Rural Health Information" and a map of the United States. The main content area is divided into several sections: "Get Rural Updates & Alerts" with a keyboard icon and a "Subscribe" button; "Find Rural Data" with a map icon and text about the "Rural Data Explorer" and "Chart Gallery"; "Funding Opportunities" with a dollar sign icon and text about "Browse all funding opportunities"; "Am I Rural?" with a map icon and text about the "Am I Rural? Tool"; "Coronavirus Disease 2019 (COVID-19)" with a virus icon and text about "Rural Response to COVID-19"; "Exploring Rural Health Podcast" with a podcast icon and text about "Insights on Educating the Rural Nursing Workforce"; and "The RURAL MONITOR" with a person icon and text about "A New Era of Health Literacy?".
