More

Arizona Rural Health Association

The Arizona Rural Health Association, Inc. (AzRHA) was established in 1994 as an independent organization after serving as the Advisory Committee of the University of Arizona Rural Health Office (RHO) for many years. AzRHA is a not-for-profit corporation and while we continue to serve as the RHO advisory body, we've expanded to cover many other areas involving advocacy for rural healthcare programs.

The mission of the Arizona Rural Health Association is to be a leader in partnerships, education and policy for improving the health status of rural communities in Arizona.

The Arizona Telemedicine Program, the Southwest Telehealth Resource Center and the mHealth, Technology & Distance Learning Special Interest Group of the American Telemedicine Association invite you to a **free** webinar to review the telemedicine and telehealth technology recently exhibited at the American Telemedicine Association's 23rd Annual Telemedicine Meeting & Trade Show: ATA 2018

Webinar

Thursday, August 9, 2018 ~ 12:00pm Arizona Time
(12pm PDT; 12pm Arizona; 1pm MDT; 2pm CDT; 3pm EDT)

“ATA 2018 Exhibit Hall Technology Review”

Learning Objectives:

1. Review some of the current trends observed at the annual signature event for telemedicine technology.
2. Take a virtual tour of the ATA 2018 Exhibit Hall & Showcase at the Chicago Convention Center.
3. Learn who and where you can go to get access to the best resources in telemedicine and telehealth technology.

Janet Major, B.S.
Associate Director
for Telemedicine
Education & Facilities

Janet Major is the Associate Director of Facilities for the Arizona Telemedicine Program (ATP). She earned her B.S. Degree in Telecommunications from Northern Arizona University with her major emphasis in producing and directing. She has worked at the University of Arizona for 30 years and was initially the primary manager of videoconferencing services at the Arizona Health Sciences Center. She has since been employed by ATP for 20 years. As Associate Director of Telemedicine Education & Facilities, her current responsibilities include the design, development and installation of the teleconferencing and telemedicine peripheral equipment used for telemedicine services. She also provides training to healthcare professionals in the effective use of teleconferencing for both clinical and educational applications. Ms. Major has served as Co-Chair as well as Chair for the mHealth, Technology & Distance Learning Special Interest Group of the American Telemedicine Association as well as for the board of USDLA; the United States Distance Learning Association, representing the telehealth constituency and ATIC; the Arizona Telecommunications and Information Council where she is currently working with fellow telecommunications experts to implement a broadband plan to eliminate telecommunications disparity in rural and urban Arizona.

Arizona Telemedicine Training Program

TRACK 1: Developing a Telemedicine Program

2020: January 27, June 1, September 14

Course Content:

This conference gives a broad overview of a variety of telemedicine topics, including:

- Clinical services
- Telecommunications and infrastructure development/operations
- Distance education
- Evaluation
- Business aspects
- Equipment demonstration virtual tour

Who should attend?

This course is excellent for individuals or groups who have some telehealth experience and are interested in expanding their services. It is also a great course for those new to telehealth who are interested in gaining a deeper understanding of this growing industry.

Conference Goals:

- To provide ongoing training for health care professionals involved or interested in clinical telemedicine and telehealth services
- To promote improved public health in rural and urban communities by providing current telemedicine and telehealth information and training
- To provide health care systems throughout Arizona and nationally with information, training, and expertise in telemedicine and telehealth applications

Register Now!

TRACK 2: Telemedicine Applications

2020: July 20 & November 2

Course Content:

This conference covers advanced telemedicine topics through an in-depth look at real-world clinical applications of telemedicine and telehealth.

Who should attend?

This course is excellent for individuals or groups who have some telehealth experience and are interested in expanding their services. It is also a great course for those new to telehealth who are interested in gaining a deeper understanding of this growing industry.

Conference Goals:

- To provide ongoing training for health care professionals involved or interested in clinical telemedicine and telehealth services.
- To promote improved public health in rural and urban communities by providing current telemedicine and telehealth information and training
- To provide health care systems throughout Arizona and nationally with information, training, and expertise in telemedicine and telehealth applications

Register Now!

Join us at an upcoming training course to enhance your telemedicine and telehealth knowledge, to network and build relationships, and discover resources to help advance your telemedicine and telehealth efforts.

Space is limited. Contact [Melanie Esher-Blair](#) for more information.

*Accredited by the ATA since May 2009

SOUTHWEST TRC TELEHEALTH RESOURCE CENTER™

Home About Us People Resources Online Education Events Partners Links Help Desk Blog

Our History. Our Mission

The Southwest Telehealth Resource Center (SWTRC) was established through a federal grant (#G221T16262) to advance telemedicine services throughout the Southwest. It is one of the first telemedicine Centers in the United States, each serving a distinct geographic region. SWTRC serves hospitals, clinics, public health offices, and other providers in the broader Southwest region.

The SWTRC assists start-up telehealth programs and serves as a resource for existing programs regarding changes in technology and other issues affecting telehealth in the Southwest region.

Telemedicine has been shown empirically to improve access to quality medical care for many patients living in rural and medically underserved areas. The SWTRC draws expertise from the internationally recognized [Arizona Telemedicine Program](#), which has been providing telemedicine services throughout the state of Arizona since 1996.

This website has been made possible by grant G22RH24279 from the Office for the Advancement of Telehealth, Federal Office of Rural Health Policy, Health Resources and Services Administration, DHHS

Western States Genetic Services Collaborative

By Elizabeth A. Krupinski on Aug 19, 2015

The need for genetic counselors is immense as there simply are not enough to cover the number of patients requiring their services.

Sound familiar? Can you think of a solution? Telegenetics of course!

But as we all know, you can't just jump into telemedicine without some degree of training. That's where the [Western States Genetic Services Collaborative](#) (WSGSC) comes into play.

WSGSC is a HRSA-funded, multi-state project seeking to improve genetics and newborn screening services through sharing of resources across the region. The WSGSC includes Alaska, California, Guam, Hawaii, Idaho, Oregon, and Washington.

The Telegenetics Education and Training Program is a joint effort organized by the WSGSC and the Heartland Regional Genetics and Newborn Screening Collaborative. Working collaboratively with the Southwest Telehealth Resource Center (SWTRC) in Tucson, Arizona, and the South Central Telehealth Resource Center (SCTRC) in Little Rock, Arkansas, the Program seeks to train genetics providers, including genetic counselors and medical geneticists, in the use of telehealth in clinical genetics practice.

A small blue circular arrow icon is also visible on the right side of the third box.

COVID-19 Telehealth Resources

The Telehealth Resource Centers are dedicated to provide healthcare providers with the resources to develop a telehealth program.

Covid Telehealth Toolkit

TELEHEALTH COVERAGE POLICIES IN THE TIME OF COVID-19 TO DATE

Timestamp: March 17, 2020 – 3 pm PT (UPDATES: Medicare, Other Federal Policies & State Actions)

As things rapidly develop regarding what we know about COVID-19, policies around telehealth have also been developing alongside of it. Below is a summary of what is covered by various public and private payers with the information that has been released. Keep in mind that events are evolving and to consider this a living document that could change frequently as new information and new policies become available/are enacted. CCHP will continue to make updates when they become available.

It was announced on March 17 that the telehealth waiver in Medicare under [HR 6074](#) has been implemented. Below is how the Medicare fee-for-service telehealth policies now stand.

MEDICARE FEE FOR SERVICE TELEHEALTH COVERAGE	
SUBJECT AREA	CURRENT POLICY UNDER COVID-19
Location of the Patient	Rural and site limitations are removed. Telehealth services can now be provided regardless of where the enrollee is located geographically and type of site, which allows the home to be an eligible originating site. However, locations that are newly eligible will not receive a facility fee.
Eligible Services	All services that are currently eligible under the Medicare telehealth reimbursement policies are included in this waiver. The list of eligible codes is available HERE .
Eligible Providers	The waiver did not expand the list of eligible providers to provide services and be reimbursed. The eligible providers are: <ul style="list-style-type: none">• Physicians• Nurse practitioners• Physician assistants• Nurse-midwives• Clinical nurse specialists• Certified registered nurse anesthetists• Clinical psychologists (CP)• Clinical social workers (CSWs) (NOTE: CPs and CSWs cannot bill Medicare for psychiatric diagnostic interview examinations with medical services or medical evaluation and management services. They cannot bill or get paid for Current Procedural Terminology (CPT) codes 90792, 90833, 90836, and 90838).

ATA American Telemedicine Association

<https://www.americantelemed.org/>

The screenshot shows the ATA website homepage. At the top left is the ATA logo (an orange square with 'ata' in white). To its right is a navigation bar with links: COVID-19 (with a gear icon), JOIN, ABOUT US, CONTACT US, LOGIN (with a magnifying glass icon), News, Events, Initiatives, Policy, Communities, Resources, and Membership. Below the navigation bar is a large hero section with a background image of a smiling female doctor in a white lab coat. The text in the hero section reads: **TELEHEALTH IS HEALTH** and 'ATA is working to transform health and care through enhanced, efficient delivery.' At the bottom of the hero section are three white boxes with orange borders. The first box is for 'ata2020' with the text 'Join us at ATA's Virtual Conference' and a 'Learn More' link with a right arrow. The second box is for 'COVID-19 News & Resources' with the text 'Learn How Our Members are Working to Support COVID-19 Care Delivery' and a 'Learn More' link with a right arrow. UA Nursing Professor Receives Telemedicine Grant to Study Tablet Use by Home Hospice Patients to Communicate with On-Call Nurses

Arizona Telemedicine Program Equipment Grant to provide technology for real-time visualization between the nurse and the patient and their caregiver.

It's the middle of the night. An elderly man in end-stage heart failure receiving at-home hospice awakes gasping for breath. His caregiver immediately phones the on-call nurse, but the drive could take her 30 minutes or more. The caregiver is too afraid to take action on her own, so she anxiously awaits the nurse. As the minutes tick by, the man becomes increasingly distressed and the caregiver grows more upset.

Shortness of breath (also known as dyspnea) is a common challenge faced by caregivers and patients in home hospice, and the leading cause of admissions to the emergency room for hospice patients.

Interested in shortening the time it takes to alleviate patient symptoms and caregiver anxiety, **Kimberly Shea, PhD, RN**, assistant professor at the [University of Arizona College of Nursing](#), conceived of using tablet technology with real-time visualization for patients and caregivers to communicate with on-call hospice nurses in urgent situations.

To support testing her idea, Dr. Shea recently was awarded a grant from the [Arizona Telemedicine Program](#) as part of its **Innovation Awards** for her project: "Real-Time Visualization for Reducing Symptom Severity in End-of-Life Care." The grant supports purchase of five iPad-minis with retina display.

"Previous studies evaluating tablet use in at-home hospice have been focused on overall quality of life and anxiety," said Dr. Shea, who has 15 years of experience as a home health/hospice nurse. "What makes my study different is I'm evaluating tablet use in urgent situations. Patient and/or caregiver anxiety can often lead to unnecessary emergency room admissions."

Each tablet will be equipped with real-time meeting software that allows the on-call nurse to immediately visualize important factors, such as a patient's positioning (lying down, sitting up) or breathing patterns and medications available. Accordingly, more individualized guidance can be given to the caregiver for intervening appropriately prior to nurse arrival.

Telehealth is a Valuable Addition to Hands-On 'Comfort Care'

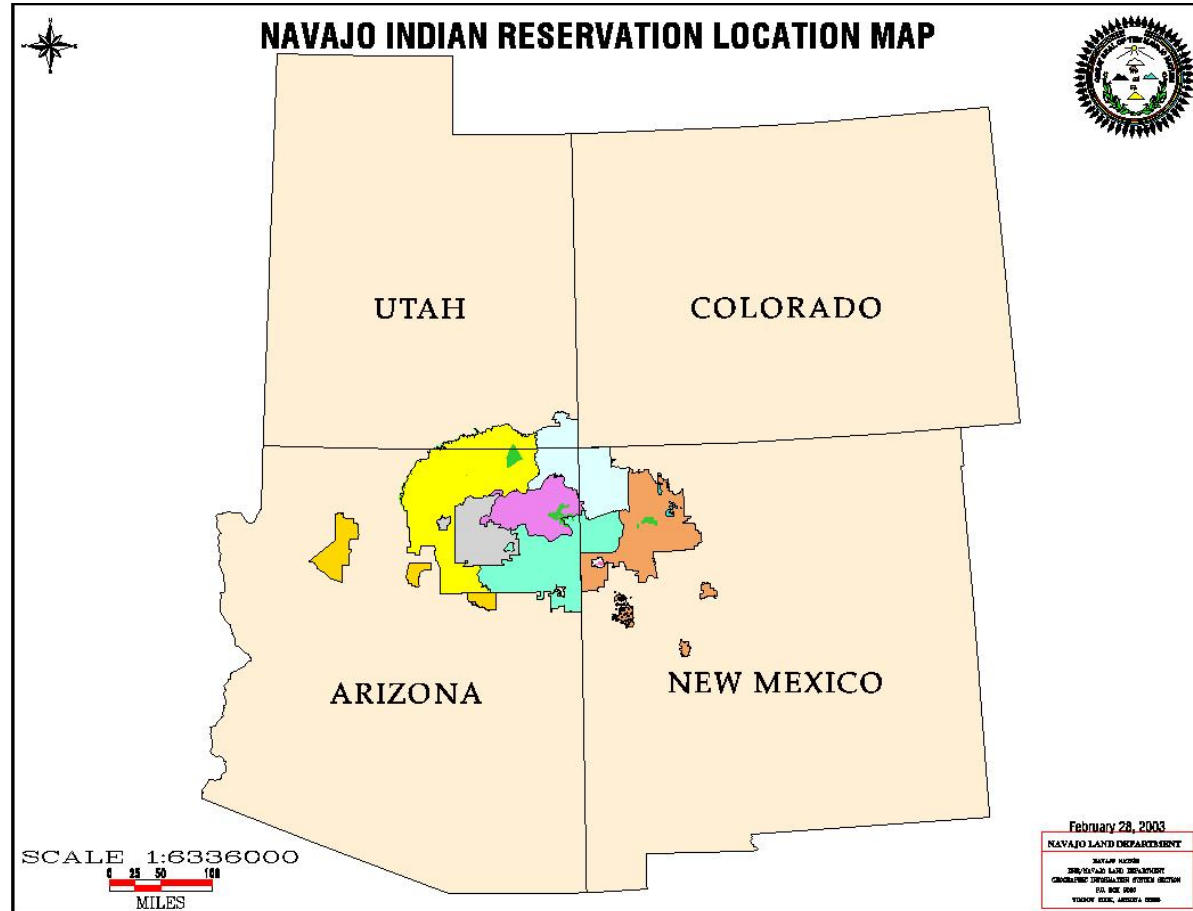

By Kimberly Shea, Ph.D., RN on Oct 15, 2015

Dr. Shea consults with a remote hospice patient via telemedicine.

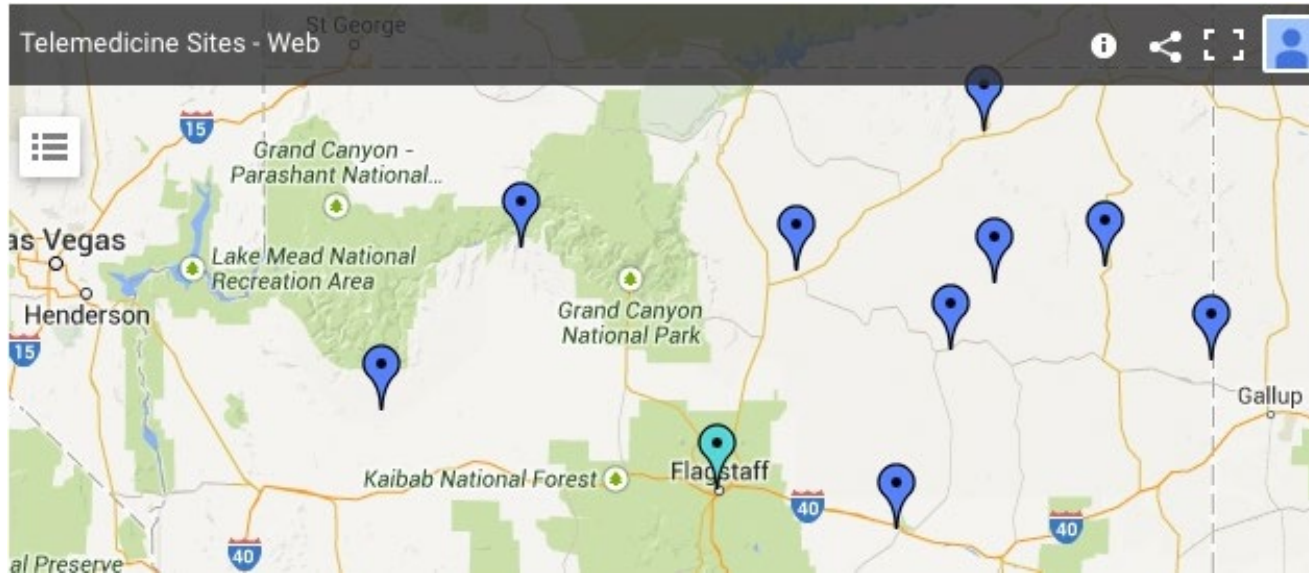

I am an assistant professor at the University of Arizona, College of Nursing, a full-time position that includes research in my chosen field of health care systems and informatics, in which I have a PhD.

I also work one day a week as a hospice nurse, providing palliative care, which is focused on comfort and quality of life for patients nearing the end of life.

Flagstaff Medical Center

<https://nahealth.com/telemedicine>

Care Beyond Walls and Wires: In-home monitoring

Using remote monitoring tools, this program is designed to improve the quality of life for people with chronic health conditions, helping patients and families get the care they need without leaving home.

With daily access to information including blood pressure, weight and symptoms of illness, care teams and patients can co-manage treatment plans. It's also possible to detect changes in a patient's health status early on and intervene at the right time to avoid unnecessary travel and hospital care.
