Ronald S. Weinstein, MD, Unveils Flexner 3.0 Medical Science Curriculum at Johns Hopkins School of Medicine

"Flexner 3.0," Dr. Weinstein's latest invention, recalibrates health science education for the United States by repositioning "introduction to medical science coursework" from medical schools into K-12 schools. His Flexner 3.0 program also calls for reducing high school education by two years, and college and medical schools' by one year each. Dr. Weinstein states, "It was an honor to be invited to introduce the Flexner 3.0 curricular model at Johns Hopkins School of Medicine, the institution that pioneered our current standard model for medical education. [Click here to see more information about Flexner 3.0.](#)

T-Health Institute

The T-Health Institute was established by The University of Arizona, in 2003, as a Phoenix division of the Tucson-headquartered Arizona Telemedicine Program. Located on the Phoenix Bioscience Campus in downtown Phoenix, T-Health's mission is to offer telemedicine and telehealth training programs, and to create "next-generation" innovations in education and healthcare delivery, especially those that leverage advances in medical informatics, wireless telecommunications, telemedicine/telehealth, simulation, and robotics. Dr. Ronald S. Weinstein, is the founding Director of both the Arizona Telemedicine Program (1996), and its' T-Health Institute.
