Why Telehealth in libraries?

According to the [American Library Association](#), people turn to and depend on libraries and librarians for help in times of economic hardship. Libraries are now safe havens for people in need, including the homeless, mentally ill, immigrants, abuse victims and the impoverished. Many libraries have services for these visitors such as congregation areas for programs and resources, but now for the first time in history, some libraries also offer healthcare services..

1. Libraries are trusted places
2. Have highly qualified staff
3. Have the technology needed
4. Have broadband connectivity
5. Libraries always involved in narrowing the digital divide

Top 10 Grant Writing Tips

- Start early
- Reach out to PO to verify fit
- Read review/scoring criteria & tailor grant to them
- Many require matching funds – get commitments & budget appropriately
- Clearly assess, document & summarize need/rationale/population served
- Have clear work plan with deliverables & timeline
- Metrics, benchmarks & criteria for success
- Collaborate – stakeholders, patients, industry, TRCs etc. – letters support
- Experience, skills, capabilities
- Have others read (critically) proposal

Grants

NTIA administers grant programs that further the deployment and use of broadband and other technologies in America, laying the groundwork for sustainable economic growth; improved education, public safety, and health care; and the advancement of other national priorities.

[Infrastructure Investment and Jobs Act Overview](#)

On November 15, 2021, President Biden signed the **Infrastructure Investment and Jobs Act** into law. This Act includes a significant investment of \$65 billion to help close the digital divide and ensure that all Americans have access to reliable, high speed, and affordable broadband. This investment builds upon the funding for broadband deployment provided in the American Rescue Plan, the Consolidated Appropriations Act, 2021, the FCC's Universal Service program, and USDA's Rural Utilities Service broadband programs. This historic investment will lay critical groundwork for widespread access and affordability of broadband, creating new jobs and economic opportunities, providing increased access to healthcare services, enriching educational experiences of students, and improving overall quality of life for all Americans.

USDA Distance Learning & Telemedicine Grant Program (DLT)

Opportunity to Apply for Funding

The USDA begins accepting applications for funding under the DLT program on April 5, 2021. Applications must be received no later than June 4, 2021, to be eligible for funding under this grant opportunity.

- The Agency encourages applicants to consider projects that will promote equity and economic opportunity in rural America, specifically those that advance the following key priorities:
 - Containing the COVID-19 pandemic
 - Ensuring racial equity
 - Rebuilding our rural economy and
 - Addressing the climate crisis.

• Congress provided USDA Rural Development \$57 million in DLT funding in Fiscal Year (FY) 2021. As it was authorized to do, the Agency applied \$18 million from FY 2021 to award projects from the prior fiscal year. Approximately \$44.5 million is available. This amount includes \$39.2 million in funds appropriated for FY 2021 as well as funds

What does this program do?

This grant program helps rural communities acquire the technology and training necessary to connect educational and medical professionals with students, teachers, and patients in rural areas.

Who may apply for this program?

Eligible applicants that provide education or health care services through telecommunications facilities, include:

- State and local governmental entities
- Federally recognized Tribes
- Nonprofit organizations
- For-profit businesses
- Consortia of eligible entities

What is an eligible area?

The intent of the DLT program is to benefit rural areas with populations of 20,000 or less.

How may funds be used?

Grant funds may be used for:

- Audio, video and interactive video equipment
- Broadband facilities that support distance learning or telemedicine
- Computer hardware, network components and software
- Acquisition of instructional programming
- Acquisition of technical assistance and instruction for using

What kinds of funding are available?

Grants funds are awarded through a nationally competitive process. Funding is not currently available for DLT loans or loan / grant combinations.

What are some grant requirements?

- Awards can range from \$50,000 to \$1 million
- A minimum 15 percent match is required and cannot be from another federal source

How do we get started?

- Application windows for this program are announced through the national office on a periodic basis
- Program Resources are available online at rd.usda.gov (includes forms, guidance, certifications, etc.)
- Check back here or contact your [General Field Representative](#) for additional information

Who can answer questions?

Contact a [General Field Representative](#) that serves your area. Call (202) 720-0800 or email dlinfo@usda.gov.

What governs this program?

- Code of Federal Regulation: [7 CFR Part 1734](#)

Why does USDA Rural Development do this?

The DLT program helps rural residents tap into the enormous potential of

Community Health Worker Training Program (CHWTP) 2022

The purpose of the program is to increase the number of Community Health Workers (CHWs) and Health Support Workers (HSWs) and train them to provide effective community support services (e.g. outreach, trust-building, assistance) that will increase access to care and support recovery from the pandemic & other public health emergencies in underserved communities.

Agency: HRSA
Deadline: June 14, 2022
Total Funding: \$226,500,000
Estimated # of Awards: 75
Max Award: \$3 million total
Project Period: 3 years
Cost Share Required: None
Rating (1 = easy, 5 = hard): 4
Eligible Applicants:

- Health professions schools, including accredited schools or programs of public health, health administration, preventive medicine, or dental public health or schools providing health management programs;
- Academic health centers;
- State or local governments; or
- Any other appropriate public or private non-profit entity such as, but not limited to: community colleges, community health centers, Federally Qualified Health Centers (FQHCs), and community-based organizations, and tribal entities that train public and allied health workers.

[Link to Program Website](#)

ELIGIBLE USE OF FUNDS

Grantees may use funds for personnel, fringe, travel, equipment, supplies, contractual, other, and indirect costs to achieve project goals.

PROJECT GOALS

- Expand the public health workforce by training new and existing CHWs and health support workers with specialized training and financial support to offset expenses that would impede success in training;
- Extend and upskill the public health workforce by developing new or enhancing existing curriculums to increase the skills and competencies;
- Increase CHW and health support worker employment readiness through field placements and apprenticeships; and
- Advance health equity and support for underserved communities by increasing the number of CHWs and health support workers.

Program objectives and required activities are organized around the categories Expansion, Extension/Upskilling, Employment, and Health Equity.

Governor Doug Ducey announced a \$100 million commitment to expand high-speed broadband to underserved areas of the state – one of the single largest broadband investments in state history. Funding comes from the American Rescue Plan Act.

[APPLY NOW](#)

SUMMARY

The Arizona Broadband Development Grant Program (ABDG) will enable local communities to construct or improve broadband infrastructure. The historic investment will build on the progress of recent years and strengthen communities' capacity and competitiveness for economic growth. The ABDG is intended to bridge the digital divide and enhance the connectivity for Arizona's citizens, businesses, healthcare institutions, government establishments, and education sector.

EBB is now ACP!

ACPBenefit.org

- NEWSFLASH: the FCC's EBB Emergency Broadband Benefit is now ACP: the Affordable Connectivity Program.
- This continues an FCC benefit program that helps ensure that households can afford the broadband they need for work, school, healthcare and more. The benefit provides a discount of up to \$30 per month toward internet service for eligible households and up to \$75 per month for households on qualifying Tribal lands. Eligible households can also receive a one-time discount of up to \$100 to purchase a laptop, desktop computer, or tablet from participating providers if they contribute more than \$10 and less than \$50 toward the purchase price.
- The Affordable Connectivity Program is limited to one monthly service discount and one device discount per household.

AZ Telehealth Alliance

Northern Arizona Telehealth Alliance (NATA)

The Northern Arizona Telehealth Alliance (NATA) is an autonomous group facilitated by Arizona Telemedicine Program (ATP) staff. NATA started in 2014 with a few Flagstaff-based healthcare organizations that wanted to share telehealth experiences and information, look for opportunities for collaboration, and help each other and the ATP advance telehealth and avoid duplication of effort.

Since then, NATA has grown to 40 organizational members. It meets quarterly via Zoom and is open to any organization serving northern Arizona that has or is working on starting a telehealth program for its patients, clients, members, or students.

For more information or to request to join, contact Janet Major, ATP Associate Director for Education and Facilities, jmajor@telemedicine.arizona.edu.

Southern Arizona Telehealth Alliance (SATA)

The Southern Arizona Telehealth Alliance (SATA) is an autonomous group facilitated by Southeast Arizona Area Health Education (SEAHEC) staff, with assistance from the Arizona Telemedicine Program. SATA was established in 2019 to offer southern Arizona organizations an opportunity to share telehealth experiences and information, learn about telehealth, and help each other and the ATP advance telehealth and avoid duplication of effort, similar to the Northern Arizona Telehealth Alliance.

SATA has 32 organizational members. It is open to any organization serving southern Arizona that has or is working on starting a telehealth program for its patients, clients, members, or students.

For more information or to request to join, contact Janet Major, ATP Associate Director for Innovation and Digital Health, jmajor@telemedicine.arizona.edu.

Telemedicine and Broadband

OeHI's **Telehealth and Broadband Initiative** develops and supports approaches that lead to increased adoption of telehealth, and reliable and affordable broadband access for health organizations and consumers. Telehealth and broadband are key priorities of the Primavera and Polis administration. Colorado has already made significant progress in providing remote access to care through telemedicine. Telehealth is an important avenue to support health care reform and is increasingly seen as an acceptable alternative to many types of in person provider visits. One of OeHI's Wildly Important Goals, or WIGs, for this year is to increase utilization of telebehavioral health in safety net providers. OeHI is also working to support expansion of telehealth policies and practices based on cost savings, economic impact, and health outcomes.

In Colorado's rural areas, only 7 in 10 people have access to broadband. OeHI's goal, in partnership with other state agencies, is to raise rural broadband availability and pave the path to achieve 100 percent access for all of Colorado. Lack of broadband inhibits the utilization of telehealth services in many parts of rural Colorado as well as the uptake of other emerging health IT capabilities. OeHI is working with the state to expand usage of telemedicine and broadband access in order to make health care across the state more affordable and accessible for all.

<https://www.americantelemed.org/>

ATA2022 will explore the landscape and examine what will be necessary to establish telehealth as a permanent modality in care delivery.

ATA2022 will showcase a mix of practical applications of telehealth – from preventative and primary care to behavioral health and other areas of specialty care – and hands-on workshops, mixed with luminary vision of important next steps for telehealth’s future.

Care Beyond Walls and Wires: In-home monitoring

Using remote monitoring tools, this program is designed to improve the quality of life for people with chronic health conditions, helping patients and families get the care they need without leaving home.

With daily access to information including blood pressure, weight and symptoms of illness, care teams and patients can co-manage treatment plans. It's also possible to detect changes in a patient's health status early on and intervene at the right time to avoid unnecessary travel and hospital care.
