Alliances

Southern Arizona Telehealth Alliance (SATA)

Northern Arizona Telehealth Alliance (NATA)

The Northern Arizona Telehealth Alliance (NATA) is facilitated by Arizona Telemedicine Program (ATP) staff. NATA is a Flagstaff-based healthcare organizations that want to share telehealth experiences and information, look for opportunities to help each other and the ATP advance telehealth and avoid duplication.

Since then, NATA has grown to 40 organizational members. NATA is open to any organization serving northern Arizona working on starting a telehealth program for its patients.

For more information or to request to join, contact Janet Major, Director for Education and Facilities, jmajor@telemedicine.arizona.edu

SATA) is an autonomous group facilitated by SEAHEC staff, with assistance from the ATP. SATA was established in 2019 to offer southern Arizona healthcare organizations telehealth experiences and information, look for opportunities to help each other and the ATP advance telehealth and avoid duplication similar to the Northern Arizona Telehealth Alliance.

SATA is open to any organization serving southern Arizona working on starting a telehealth program for its patients.

For more information or to request to join, contact Janet Major, ATP Associate Director for Education and Facilities, jmajor@telemedicine.arizona.edu

Telehealth Advisory Committee

Subscribe to Receive Committee Updates

The Telehealth Advisory C...
identifying best practices l...

Purpose

- Requires the Advisory Committee to review national and other standards for telehealth best practices and relevant peer-reviewed literature.
- Allows the Advisory Committee to conduct public meetings at which testimony may be taken regarding the efficacy of various communications media and the types of services and populations for which telehealth is appropriate.
- Requires the Advisory Committee to adopt telehealth best practices guidelines and recommendations regarding the health care services that may be appropriately provided through an audio-only telehealth format and make updates, when applicable.
- Requires the Advisory Committee, before making its recommendations, to:
 - Analyze medical literature and national practice guidelines;
 - Consider the comparative effectiveness, safety and benefit to the patient of performing a service through an audio-only telehealth format instead of in person or through an audio-visual format; and
 - Consider the appropriate frequency and duration of audio-only telehealth encounters.
- Allows the Advisory Committee to authorize subcommittees to address select issues or services and report to the Advisory Committee as directed.
- Requires the Advisory Committee to submit a report to the Governor, the President of the Senate and the Speaker of the House of Representatives by:
 - December 1, 2021, with recommendations regarding the specific health care services that are appropriate to provide through an audio-only telehealth format as a substitute for an in-person or audio-visual telehealth encounter; and
 - June 30, 2022, with recommendations regarding telehealth best practice guidelines for health care providers.
- Requires AHCCCS to staff the Advisory Committee and provide meeting space.
- Requires, from October 1, 2021 until January 1, 2026, each health care provider regulatory board or agency to submit to the Advisory Committee a report identifying the number and type of out-of-state health care providers who have applied for interstate telehealth registration and the number and type of out-of-state health care providers who registration has been

2023 Arizona Center for Rural Health Spring Webinar Series

A webinar series focused on providing technical assistance to rural stakeholders to disseminate research findings, policy updates, best-practices and other rural health issues to statewide rural partners and stakeholders throughout the state.

Will Humble

Executive Director, Arizona Public Health Association

Tons of Public Health Authority Was Lost to Preemption in 2022: Is a Claw-back Possible?

February 16th, 2023
12:00 - 1:00 pm

Learning Objectives

- ▶ Identify 3 new ways local public health authority has been preempted by state laws.
- ▶ Describe how the current and future governors will have less public health emergency authority compared with that enjoyed by the governor and ADHS director during the COVID-19 public health emergency.
- ▶ Be able to provide a status update of bills affecting public health authority that have been introduced during the 2023 legislative session.

Will Humble is a long-time public health enthusiast and is currently the Executive Director for the Arizona Public Health Association (AzPHA). His 40 years in public health include more than 2 decades at the Arizona Department of Health Services, where he served in various roles including as the Director from 2009 to 2015. He continues to be involved in health policy in his role as the Executive Director for the AZPHA. Will is a believer in using evidence-based health policy to improve health outcomes and in leading and managing with emotional intelligence. Follow him on Twitter @willhumble_az

This webinar is made possible through funding provided by Health Resources and Services Administration, Office for the Advancement of Telehealth (U1U42527). Arizona State Office of Rural Health is funded granted through a grant from US Department of Health and Human Services. Grant number H95RH00102-25-00. This information or content and conclusions are those of the author and should not be construed as the official position or policy of, nor should any endorsements be inferred by HRSA, DHHS or the U.S. Government.

ARIZONA TELEMEDICINE PROGRAM WEBINAR SERIES

The practice and delivery of healthcare is changing with an emphasis on improving quality, safety, efficiency, & access to care. Telemedicine can help you achieve these goals! The Arizona Telemedicine Program and Southwest Telehealth Resource Center invite you to a free one-hour CME webinar on the implementation and practice of telemedicine.

CME provided by The University of Arizona College of Medicine - Tucson

TAKING YOUR TELEMEDICINE PROGRAM TO THE NEXT LEVEL: EXPLORING ASSESSMENT METRICS & METHODS

WEDNESDAY, FEBRUARY 15, 2023

11:00 am MST ~ 12:00 pm CST ~ 1:00 PM EST

PRESENTER

Elizabeth Krupinski, PhD
Professor, Emory University
Associate Director, Program Evaluation,
Arizona Telemedicine Program
Director, Southwest Telehealth Resource Center

Join us to learn about how assessments can be utilized in positively transforming your telemedicine practice into a more effective process.

OUTCOME OBJECTIVES

- Name the different types of metrics available for assessing telemedicine program impact
- Describe the fundamentals of Implementation Sciences when assessing programs and interventions
- Increase telemedicine program effectiveness by measuring impact

Dr. Krupinski is Professor and Vice Chair for Research in the Department of Radiology and Imaging Sciences at Emory University School of Medicine. Prior to joining Emory, Dr. Krupinski was a Professor at the University of Arizona in the Departments of Radiology, Psychology and Public Health, and was also Vice Chair of Research in Radiology. She is past president of the American Telemedicine Association, and past chair of the Society for Imaging Informatics in Medicine.

Covid-19's Telemedicine Sea Change: A Surge or a Tsunami? Imagining the Future

By Camryn Payne, Elizabeth A. Krupinski PhD, Ronald S. Weinstein MD on Jan 14, 2021

A storm surge and a tsunami are vastly different entities. A storm surge is an oceanic phenomenon resulting from the piling up of surface water from the sustained pressure of wind in a storm. Damage.

Seven Vital Questions To Ask When Choosing A Virtual Care Platform

By Nathan Bradshaw on Sep 24, 2020

Seeking a virtual care platform? Here are seven critical questions to ask your vendor before you make your choice.

Telemedicine has inevitably reached its pinnacle during the recent public health emergency. Virtual care has evolved as the new norm in the healthcare industry. However, it is subject to technological barriers and limitations, which must necessarily be addressed to deliver quality care.

Telehealth Does Not Equal Video Visit!

By Jan Ground, PT, MBA on Jan 20, 2021

I spend many hours every week in meetings regarding telehealth. I lead one on proving the value of telehealth. I participate in others focused on mental health, pediatrics, ocular care, the business of telehealth. Over time I've realized that in most cases the focus is on the technology, not the patient. Telehealth is not just a video visit. It's a whole new way of thinking about care.

5 Tips for Preparing Your Child for a Telemedicine Visit

By Rhonda Martinez on Sep 16, 2020

The coronavirus pandemic has changed our lives in many ways. Adapting to the "new normal" can be challenging, but there are ways to prepare your child for a telemedicine visit.

A Rural Perspective on COVID-19: Yavapai County, Arizona

By Nandini Sodhi on Jul 30, 2020

The COVID-19 pandemic has completely transformed our world in a matter of a few months. Issues that have prevailed for years like healthcare access disparity, have become exacerbated even though agencies have put forth their best efforts to mitigate the effects.

Telemedicine Helps Hard-hit Navajo Nation Hospital Deal with the Pandemic

By Nancy Rowe on Jul 01, 2020

In May, the Navajo Nation surpassed New York and New Jersey for the highest per-capita infection rate of COVID-19 in the US. In an area where 30 to 40 percent of residents don't have running water and families live together in multigenerational homes, containing the spread has been difficult. In addition, residents can't stay at home and see a healthcare provider using telemedicine, so so many of us have

National Consortium of Telehealth Resource Centers

NATIONAL CONSORTIUM OF
TELEHEALTH
RESOURCE CENTERS

Funded by the U.S. Health Resources and Services Administration (HRSA) The National Consortium of Telehealth Resource Centers (NCTRC) consists of 14 Telehealth Resource Centers (TRCs). As a consortium, the TRCs have an unparalleled amount of resources available to help virtual programs across the nation, especially within rural communities. Each TRC is staffed with telehealth experts to who are available to provide guidance and answer questions. As telehealth continues to gain more visibility and recognition in healthcare, the TRCs will remain positioned to provide assistance for all.

LA TELESALUD PROVEE LA ATENCIÓN MÉDICA ADECUADA A LOS PACIENTES DONDEY CUANDO LA NECESITAN

Actualizado a septiembre de 2017

¿Espera...

- ▶ darles más **acceso** a los pacientes?
- ▶ aumentar el **mercado** para los proveedores?
- ▶ **reducir costos?**

Objetivos en telesalud?

- Supervisar a distancia el estado de salud y el comportamiento de los pacientes.
- Reunirse cara a cara con los pacientes usando videoconferencias para hablar y dar tratamiento.
- Obtener imágenes para hacer diagnósticos usando miras y cámaras especializadas.
- Capturar, guardar y luego enviar imágenes.

Factores que se deben considerar sobre las credenciales

En julio de 2001, la decisión final de los Centros de Servicios de Medicare y Medicaid sobre la emisión de credenciales y privilegios estableció un proceso para que los hospitales del lugar de origen (ubicación del paciente) confiaran en las decisiones sobre credenciales y privilegios del hospital en el lugar distante (ubicación del especialista).

Telemedicine and Telehealth Overview

The history, progression and current uses of Telemedicine and Telehealth.

Clinical Applications Overview

Clinical services (real-time and store-forward) that have been amenable to telemedicine consultation and how these services can help underserved areas.

Telecardiology

Definition of telecardiology services, requirements to provide this service, and current applications.

Teledermatology

Definition of teledermatology services, requirements to provide this service, and current applications.

Telenursing

How telenursing can help close the nursing shortage gap. Case studies are presented and outcome results are discussed.

Telepathology

Definition of telepathology services, requirements to provide this service, and current applications.

Telepsychiatry

Definition of telepsychiatry services, requirements to provide this service, and current applications.

Teleradiology

Definition of teleradiology services, requirements to provide this service, and current applications.

Teletrauma

Definition of teletrauma services, requirements to provide this service, and current

Distance Education

The role of tele-education in continuing medical education for various healthcare professionals and the necessary components to set up such a program.

Evaluation

The importance of evaluation in telemedicine/telehealth and how it relates to acquiring and organizing data about the program that can be used to obtain funding for increased sustainability.

Business

Sources of funding for telemedicine/telehealth programs, the business model developed and used by the Arizona Telemedicine Program, and paths towards sustainability and business planning.

Facility Design

Go through the steps required to set up a telemedicine/telehealth facility, including placement of the equipment, lighting, wall color, etc.

Video and Data Communication

Basic introduction to networking and data communications. Description of the Internet, local area networks, Ethernet, wireless communications and communication modes (e.g., Internet, satellite, wireless), including the advantages and disadvantages of each as they relate to telemedicine/telehealth.

Telemedicine/Telehealth Network

Basics of how a telemedicine/telehealth network is set up and the roles of various pieces of equipment: CODECs, MCUs, computer applications (e.g., videoconferencing, Skype), video bridges, gatekeepers, and communication protocols (e.g., H.239).

Culture, Etiquette & Technology

The impact of technology on social interaction and the universal rules of good manners and technology.

Service Provider Directory

Welcome to the Telemedicine & Telehealth Service Provider Directory, a service of the Arizona Telemedicine Program. The directory is a free resource for hospital or healthcare administrators and other decision-makers who want to expand or improve their healthcare services to their patients, employees, clients, etc through teleservices. The directory lists companies

providing clinical telehealth services by a healthcare professional who provides medical services (such as radiology, rheumatology, neurology, psychiatry) and ancillary services (such as patient education and language interpretation) through telemedicine to healthcare providers such as hospitals, clinics, nursing homes, private practices, urgent care centers, and/or to consumers.

Service Providers: [List your company here.](#)
