

Improving Access to Quality Medical Care

The practice and delivery of healthcare is changing with an emphasis on improving quality, safety, efficiency, & access to care. Telemedicine can help you achieve these goals! The Arizona Telemedicine Program, Southwest Telehealth Resource Center, and the University of Arizona COM, Department of Medicine invite you to a **free** webinar on the implementation and practice of telemedicine.

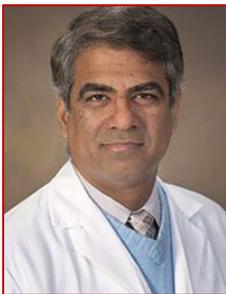

“Provider-to-Provider Telehealth”

Monday, April 11, 2022 ~ 1:00 pm PDT/4:00 pm EDT

Learning Objectives

1. Future of Provider-to-Provider telehealth in Rural Areas
2. Telemedicine use during the pandemic
3. Exemplars and variations in telemedicine use

Presenter:

**Sairam
Pathasarathy, MD**

Dr. Sairam Parthasarathy is involved in telemedicine and has created a new resource for physicians in the state of Arizona. With the Provider-to-Provider warmline we are hoping to offer rural physicians an avenue to ask for the most up-to-date COVID guidance from critical care specialists. As it stands, rural physicians who need assistance would call in to the helpline with their questions regarding patient cases, and within 24 hours receive advice either through text/email/or phone calls from volunteer doctors from Banner. This is a resource that physicians who have been overwhelmed with trying to keep up with COVID data have asked for.
